PLEASE READ ALL INSTRUCTIONS BEFORE USE

CAUTION

PureWave™ Cells are completely safe for humans, pets, plants, food and all biological life forms however they do contain powerful Neodymium magnets and therefore caution should be exercised when using this device near or with electronic equipment.

- Do not place or store near electronic equipment such as computers, external digital storage devices (USB's), electronic watches, pacemakers, credit/debit cards and any storage media that uses magnetic tape. Please keep them approximately 1 foot distance away.
- Do not store on or near any heat source as heat tends to weaken magnetic strength.
- Do not store on or near steel or metal objects as the magnet fields emitted from the PureWave™ Cell will “entrain” molecules in steel and some metals and will make them magnetic. This will not harm steel or metal objects but it could make them magnetic which you may not necessarily want.
- Do not immerse in water. Although the PureWave™ Cell is contained in a sealed outer casing which makes it waterproof, the device is not intended for underwater usage and could cause leakage.

WARRANTY ON THE PUREWAVE™ CELL

- We offer a platinum Warranty on every PureWave™ Cell. We guarantee to cover any Cell that breaks for 20 Years as long as it has not been intentionally damaged or destroyed. All you have to do is ship back the broken case with all pieces and with all 12 neodymium magnets and your brand new PureWave™ Cell will then be drop shipped to your address for free.

CARE & STORAGE OF YOUR PUREWAVE™ CELL

DOES HEAT AND/OR COLD AFFECT THE PUREWAVE™ CELL?

- When exposed to extreme temperatures magnetic properties can be affected. While cold strengthens magnets, heat can result in the loss of magnetic properties. In other words, too much heat can completely ruin a magnet. We advise keeping the PureWave Cell away from heat over 130 degrees fahrenheit. Cold temperatures (like the refrigerator) are great but avoid freezing temperatures below 32 degrees fahrenheit.

HOW LONG DOES THE MAGNETIC FIELD LAST?

- 50 years plus. Let's say the length of your life... and beyond. Neodymium magnets are the strongest and most permanent magnets known to man.
- If they are not overheated or physically damaged, neodymium magnets will lose less than 1% of their strength over 10 years - not enough for you to notice unless you have very sensitive measuring equipment.

HOW DO I CLEAN MY PUREWAVE™ CELL?

- To keep your PureWave™ Cell clean, wipe the outer casing with warm water and a mild soap.
- Do not use solvents or chemical cleaners of any kind.

THE SACRED DESIGN

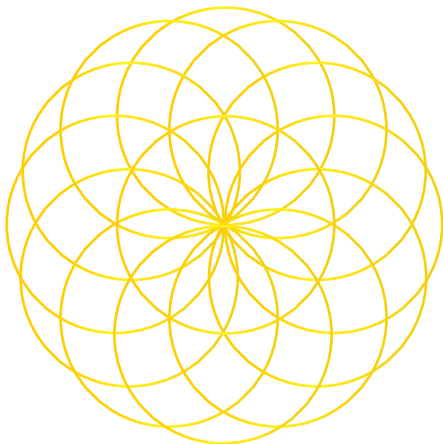

There is a sacred code, a timeless common language that has been spoken throughout all of nature, in every culture, in every belief system, in every location and throughout every eon of time.

Modern science is proving that this ancient code is the key to our existence, our evolution and our vitality.

So what is this sacred code? In short, it is nothing more than specific geometric patterns that exists everywhere and is the microscopic structure within every molecule and atom.

The Flower of Life is a geometric symbol that typically consists of nineteen overlapping circles that are spaced evenly apart from one another

This shape, combined with the crystalline hexagon structure, is the foundational “Life Force” mathematical formula that is now available for you and your loved ones in the PureWave Cell.

THE PUREWAVE CELL

A QUANTUM FIELD GENERATOR

One of the earliest English meanings of quantum (1567) goes back to philosophy for “Something that has quantity.” One of the earliest scientific uses of the term was in physics as “The quantity of electric fluid present in an electrically neutral body” (1870). In 1952, there was use of quanta (singular of quantum) in physiology as in “a small voltage of which integral multiples go to make up the end-plate potential measured at a neuromuscular junction.”

The current definition from physics and as a noun is; “A discrete quantity of electromagnetic energy proportional in magnitude to the frequency of the radiation it represents, such that energy of that frequency may only be transmitted in multiples of the quantity.”

HOW DOES IT WORK?

According to various historical and modern definitions of the word quantum, the PureWave cell seems to manifest these qualities. The “Sacred” geometry configuration of the 12 attracting and opposing poles of the powerful neodymium magnets that are fastened securely inside the cell, produces a spiral vortex of both magnetic and electrical energy that can be measured with a Tesla meter capable of reading ultra-low frequency alternating current electromagnetic fields.

To demonstrate this phenomenon using a Tesla meter, set the meter to read electric fields and then move the cell quickly in an even frequency of motion in front of the meter. You will then be able to observe the quantity of this unique “Universal” force field. Our researchers call it the PureWave Quantum Field and they feel this energy is the secret ingredient of our technology. The secret lies in the placement of the neodymium magnets within the sacred geometric “Flower of Life” pattern with a combined strength of approximately 48,000 Gauss.

HOW IT WORKS

- The PMF disc consists of 12 neodymium magnets assembled together within an inert casing.
- By combining Sacred Geometry and rare earth neodymium magnets, it is easy and safe to use.
- The opposing and attracting forces of the magnet's positive and negative poles, which are arranged in a specific hexagonal pattern and which are not attached to each other, create a blossoming vortex of geomagnetic fields that radiate out up to approximately 1 foot around the cell. This can be measured with a sensitive Tesla meter, however, the quantum biological field effects of the cell, that cannot be measured, may expand several meters.
- All of our PureWave™ Cells come with an industry leading 20 Year Guarantee! If it breaks and we determine it was not subjected to abuse or intentional damage, we will replace it for free, as long as all of the magnets and the completely damaged outer casing are returned.

FEATURES

- Safe & Simple to Use
- Strong & Durable
- No Electro-Magnetic Fields (EMF's) - Only Natural Whole Earth Geomagnetic Fields
- No Chemicals Used or Needed
- No Operator Error - Simply place the PureWave Cell where you want the magnetic field to flow
- No Power Source Required - Super powerful rare earth magnetic energy creates a field that holds its strength for over 50 years.
- Portable and Great for Travel and Camping

FOR BEEKEEPERS

OVERVIEW

It couldn't be easier for us to explain how to use the PureWave™ Cell with beehives and the bees. Just about every different application technique that has been employed by beekeepers has had a positive effect on bee health, colony growth and honey production. With that said, some techniques have produced better results than others but not always or in all cases.

As a beekeeper, you know your bees better than anyone else and you also understand the natural symbiosis between a beekeeper and their bees so you will know what to do best and what the bees like best.

Beekeepers tell us that they have not ever experienced any negative results whatsoever from utilizing PureWave™ Cells over the period of any full season since their introduction in 2015.

Yes, swarming can occur during the year which may mean less honey production during this particular period, however, beekeepers say this is the sign of a healthy growing colony adapting to the magnetic field and by the end of the harvest season they find that these colonies still produce significantly more honey than non-treated hives. So they don't consider this a negative effect at all and is no cause for concern.

As a matter of fact, many beekeepers tell us they are able to rebuild all of their non-PureWave™ bee colonies (that experienced massive die-offs) from the healthy PureWave™ hives so this has been extremely cost beneficial and positive for the beekeepers.

APPLICATION

- PureWave™ Cells are most commonly placed inside on the bottom board of the hive for best results. Beekeepers suggest that this seems to produce more honey consistently and placing it within the entrance gives the bees the opportunity for direct near field exposure as they exit and enter the hive.
- Many beekeepers also place the PureWave™ Cell on the top of the hive if there is a metal lid. This will entrain the metal with the same field and potentially make for a larger energy field. Note that this will not weaken the magnets in the Cell.
- This technique also appears to create a sort of “beacon effect” for the bees to easily find their way back to their home. This may be beneficial to beekeepers that experience abandonment.
- As the hives grow and more boxes are placed onto the existing hives, it is recommended that the PureWave™ Cell be placed on the bottom board as more boxes are attached. This will keep the magnetic field near the brood as it increases in size throughout the season.
- As always, the bees will let you know where they like it best but you can experiment a little to help them out as well. We appreciate feedback!

WINTER PACKING

With winter packing of the hive, most beekeepers place it inside on the top board before closing it up for the winter or wherever you leave food for the bees to eat during the winter months. This gives all the bees an opportunity for direct exposure of PureWave™ energy fields as they eat.

PureWave™ energy fields will help to keep your bees healthy and vibrant in order for them to keep their hive warm throughout the long cold winter months and this could significantly increase their chances of survival when unpacked in the spring.

P Beekeepers say PureWave™ hives are usually always healthier and more active in the spring than untreated hives and they will be more eager to get out and start foraging earlier than other hives giving them a much better chance of continued colony growth and survival against pesticides, diseases, harmful EMF's and mite infestation naturally.

You will also appreciate the increased production of honey a healthy hive will produce. Some beekeepers claim to see an additional production of 100 to 250 Lbs per hive with PureWave™ Cells so this can be very significant.

And as we say "Healthy Bees Make Healthy Honey.

APPLICATIONS OF USE FOR FOODS

Our current toxic environment within today's food source needs to be addressed in order to receive the highest nutritional value from our foods.

Addressing the pathogens and superbugs in our food supply naturally, without chemicals, is a significant part of our mission.

The PureWave™ Cell can play an important role in mitigating the negative effects of our present food borne problems. Please see the independent Research Study for effect of PMF Magnetic Disc (now known as the PureWave™ PMF Cell) on different microorganisms at www.4rbees.com

- The study was conducted by an independent third party lab (Pathogenia).
- The conclusion depicts that the PMF Magnetic Disk (now known as the PureWave™ PMF Cell) can be applied to efficiently cause log reduction for some of the pathogens in food matrices.
- Percent log reduction of various microorganisms can be seen within the report.

Both raw and cooked fruits, vegetables and meats will benefit from exposure to PureWave™ Energy Fields. The longer the exposure the better for reducing bacteria and pathogens contained in foods.

Place your PureWave Cell under a plate that contains your fruit, vegetables and meats. Certified lab reports clearly demonstrate that after only 5 minutes of exposure, the PureWave Cell can significantly reduce or eliminate a wide variety of pathogens that cause food to spoil. You may notice that certain foods last considerably longer. Test it for yourself and tell us of your success.

We also recommend placing the Cell into your refrigerator on the middle rack, centrally, within your refrigerator to expose your foods to the PureWave™ field all day long while you are at work or play. Your foods may last longer from spoiling and stay fresher and therefore healthier due to the reduction of bacteria and pathogens that are constantly breaking down fresh foods and destroying nutrients.

The elimination of harmful pathogens and bacteria with the PureWave Cell is scientifically proven and confirmed by Pathogenia, which is an authorized Health Canada certified food laboratory and testing facility.

WATER, JUICES, TEAS AND LIQUIDS

It's a well known fact that geomagnetic fields will "structure" the molecules of water. Many people have learned about "structured water," its properties and the numerous health benefits of drinking structured water daily.

There are a number of ways to structure water and most water from fresh water artesian wells are naturally structured from the magnetic properties from the earth's geomagnetic frequency as it passes through layers of gravel, sand and rock on its way up the earth's surface.

Over short periods of time, as water sits, the molecules can slowly lose their whole earth structure as other, not so positive frequencies in our environment, are exposed to it. Frequencies from such sources as microwave ovens, WIFI, EMF's, dirty electricity and even negative emotions, thoughts and words as proven by Dr. Masaro Emoto in his Water Consciousness Study in the mid 1990's, negatively effect the life force in the water.

Since water makes up approximately 70% of the human body and about 72% of the earth's surface, healthy structured water is vital to our health and wellness and vital to all life itself.

Keep your water and other beverages recharged constantly with positive earth energy by placing the PureWave™ Cell under your cup, glass or containers and let the positive energies flow through to structure the molecules that benefit the vitality and health of you and your family. It's most effective when the water moves through the magnetic field so attaching it to your water intake pipe will structure and revitalize the entire water in your home.

FOR PETS

Place the PureWave™ Cell underneath your dog or cat's food dish to help reduce pathogens in their food and expose them to the PureWave™ healing energy fields while they eat.

Place it under or in their beds so they can get constant positive exposure while sleeping to energize their cells and maintain optimal health.

For birds and other smaller pets try to magnetically attach it to the bottom or top of their birdcage or other caged habitat that your small pets live in. This may not only assist in their health but will also purify their foods.

For a fish tank, try placing it underneath the fish tank in the center position and placing two flat wooden sticks the same thickness of the PureWave Cell on either end of the tank. Be careful not to place the Cell too close to the oxygenator as this may affect the windings in the small electric motor.

When it comes to helping your pets, use a PureWave™ Cell as much as possible to energize their drinking water and food with positive natural whole earth magnetic fields that are beneficial to biological life.

The precious little beings in your family will love the wholesome and healthy geomagnetic fields of PureWave™ every day. Help make them healthier and happier.

PLANTS, HERBS AND FLOWERS

The Earth's magnetic field is an inescapable environmental factor for plants. All living organisms experience the action of the Earth's Geomagnetic Field which is a vital component of the natural environment. The Earth's geomagnetic field is constantly acting on living systems, and is known to influence all biological processes.

Many aspects of plant growth, seed germination, yield, quality and water are affected by magnetic fields. The stimulation of plants with magnets as a way to increase the quantity and quality of seed germination, seedling development and yields of different species, such as herbs and medicinal plants, different vegetables and fruits, grasses, ornamentals and other crops- has caught the interest of many scientists around the world.

PureWave™ Power Cell Geomagnetic Fields are proven to be beneficial to bees and they are scientifically classified as an “indicator species” which means they react quickly to changes in their environment and can “indicate” to us what those changes are and what may be causing them.

Whatever changes the bees are reacting to in their environment, good or bad, these reactions are also happening to all other biological life forms within the environment, including plants, herbs and flowers. The bees don't lie.

So if it's good for the bees, it's more than likely good for plants and animals too.

If you have indoor plants or flowers, place a PureWave™ Cell underneath the flower pot for a few minutes to enhance its growth, reduce pathogens and bacteria and assist in the plants health and vitality. It may even help to enhance the colors of flowers.

If you have cut flowers, you could place the PureWave™ Cell underneath the vase to extend the life and beauty of your flower arrangements. Note that not all plant life respond to magnetic fields in similar ways. Instead of chronic exposures, some plants respond better to water that has been previously energized by the Purewave cell for short periods. Help make your indoor floral beauty last as long as possible.

For pennies a day you may grow bigger, faster, fuller and more nutritious plants, flowers and herbs without anything more than a PureWave™ Cell, pure water, light and your loving touch.

FOR PEOPLE

Magnetic fields have historically been used for thousands of years for the relief of pain and to promote other health benefits. As far back as ancient Egypt, records of using magnetic stones (lodestones) have been painstakingly documented for use medicinally for everything from minor conditions to serious diseases and even anti-aging.

Although we have not completed our independent long term study or research in this area for the human body, we do recognize that there is an abundance of other researchers, doctors and scientists that have undertaken serious research on this subject, especially during the last 70 years and have published many scientific reports.

NOTE: We only make claims based on completed 3rd party independent laboratory studies on food borne pathogens and our own lab and field studies conducted with independent beekeepers. We make no claims that PureWave™ Cells are related in any way to health and the human body.

Although we cannot suggest that PureWave™ Cells will cure whatever ails you, we do know that PureWave™ energy fields are definitely beneficial to the bees health and vitality and that magnetic fields are scientifically proven to be beneficial to biological life on a cellular level. These benefits may assist your body in its natural ability to help correct itself along with and without negatively affecting any other health modalities you choose to undertake.

The PureWave™ Cell is not a “magic pill” but it has been scientifically proven to reduce harmful bacteria and pathogens in food and that may also include those harmful pathogens and bacteria that are created by a specific condition or that reside in your body.

We do know that PureWave™ energy fields are not harmful and there is not a single scientific study that we have found that even suggests earth based static magnetic fields have caused the slightest harm to anyone. In fact, life on earth cannot live without the earth’s natural magnetic field.

For pain or other ailments, simply apply the PureWave™ Cell directly on the area of your body that you believe needs help or healing and let the spiral energy fields flow through. It's best to move the Cell continually above the area of your body that you feel needs healing. Practitioners in energy medicine who use their own biomagnetic field to heal patients may use the PureWave Cell to amplify the effect by moving it over the patient.

Some people tell us they find nearly instant relief and results. Some may take more time in noticing any difference at all. Keep using the Cell even after the pain or discomfort stops as the area may still benefit from the energy field to help the body correct itself back to its normal homeostatis state.

Sit with it on your lap or behind your lower back in the chair or sofa while working or relaxing. Movement of the cell or your body will enhance the benefits.

Place it under your pillow or beside you when sleeping. (note: some people find the field so energizing that it may make it difficult to get a restful sleep. If so, place it near your lower legs or feet and if it still interrupts your sleep pattern then do not sleep with it at all)

As always, a positive mental state and a firm intention for perfect health and healing will always benefit you no matter what health strategies you utilize. Mindfulness and meditation are key components to your mental, emotional and physical health under any circumstances.

Remember, the restorative and regenerative effects from the PureWave™ Cell may take some time, perhaps months or in some cases even years.

Don't be discouraged because it will probably be benefiting you in ways that you may never become aware of.

- It can't hurt and may only help.
- Use it daily whenever you can.
- Share it with others.
- Movement of the cell will increase its benefits
- Be thankful and in gratitude.

Just like comparison is the thief of joy, fear is the thief of confidence.

Lose the fear and there's nothing to stop your confidence from growing exponentially.

Knowing you're capable of great things is a mental state, and throwing fear as aide is the first step in personal healing and total health and becoming the most amazing you, that you can be!

Somewhere in this realm of Vibrational Frequencies, Pulses and Patterns, through a now newly discovered medium called the "Quantum Field," lies the true mechanics of creation.

As the increasing awareness of new, yet old notions of Sonoluminescence and Magnetic Fields and Positive Frequencies, we need to ask ourselves if these tools of creation are what we are intended to master. Franz Anton Mesmer, the father of "Animal Magnetism" who called the human biomagnetic field The Universal Fluid, was one of the first medical doctors to teach the use of magnets to treat mental illness.

Free energy, grounding, resonance, frequency medicine - these are topics that have seen a massive rekindling of interest because "science" now accepts and sometimes embraces the quantum world. The PureWave Cell is just the user interface to this dimension.

Everything else you have been told is only a theory.
