

PARKINSON'S

“Dear Dr. Paul Lee,

Here is an update of the patient with Parkinson's disease. I saw him in the church today, and he was ecstatic to see me and wanted to share with me his testimonials. He started out taking three bottles of Maragen since October of 2017 without many expectations. However, after others commented that he seems to be doing much better, he was encouraged to take it faithfully through November, twice a day. He said his tremors almost disappeared! He is 75 years old, and his Parkinson's was not hereditary but caused by severe stress from his work. After the onset of the disease, his life quality was miserable but now lives a new life because of Maragen. Though he is not a Christian, he came to my church to share the good news with me!”

Testimony about a patient by Dr. Paul Lee, 75 Male, Korea

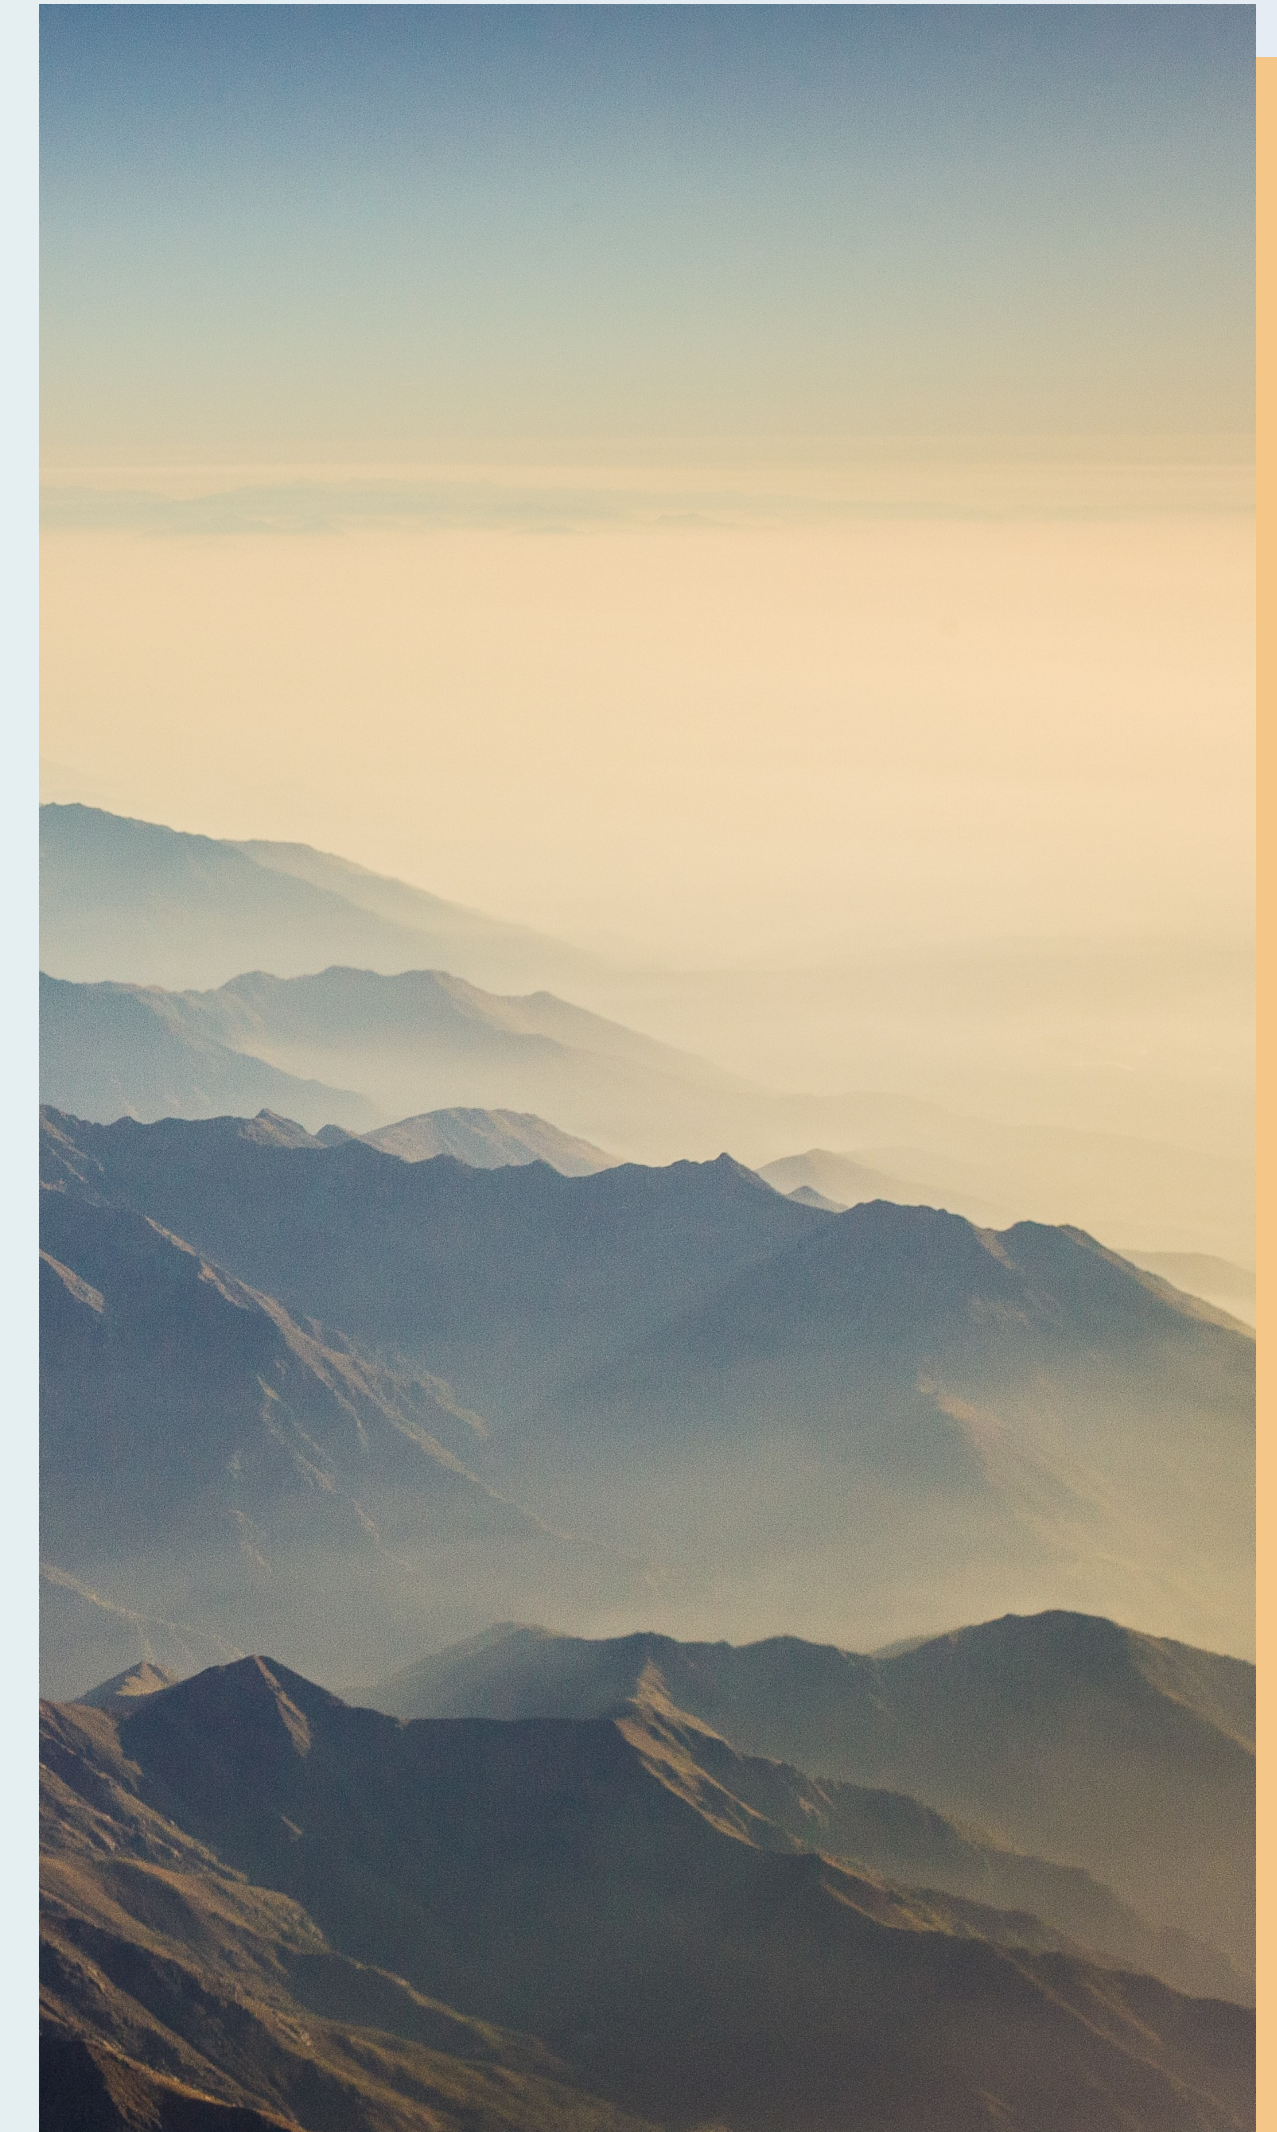

KIDNEY FUNCTIONS RAPIDLY IMPROVING!

Years of dysfunctional kidneys sucked the life out of me and even turned my face into a deathly dark color. I tried everything from eastern to western medicines, but nothing seemed to help. Then at the plea of a close friend, I started taking MaraGen. In about a month, I have noticed that my face turned back to normal and my body felt much better.

I thought it was the effects of all the medication I had been taking, and immediately stopped taking the MaraGen. (I thought it was a bit pricey.) I felt good for a few days, but then my condition deteriorated slowly, and in about two weeks my face started to turn dark again. I got back on MaraGen again and discovered how amazing and powerful the product was. Experiencing rapid restoration of my kidney functions and seeing my normal face again in the mirror is simply unbelievable! I thank my friend and Pronuvia for these wonderful products.

- C. Park - Male, 65, Singapore

(Stage 4 Chronic Kidney Disease with gout and diabetes with insulin, overweight)

DOCTOR'S TESTIMONIAL

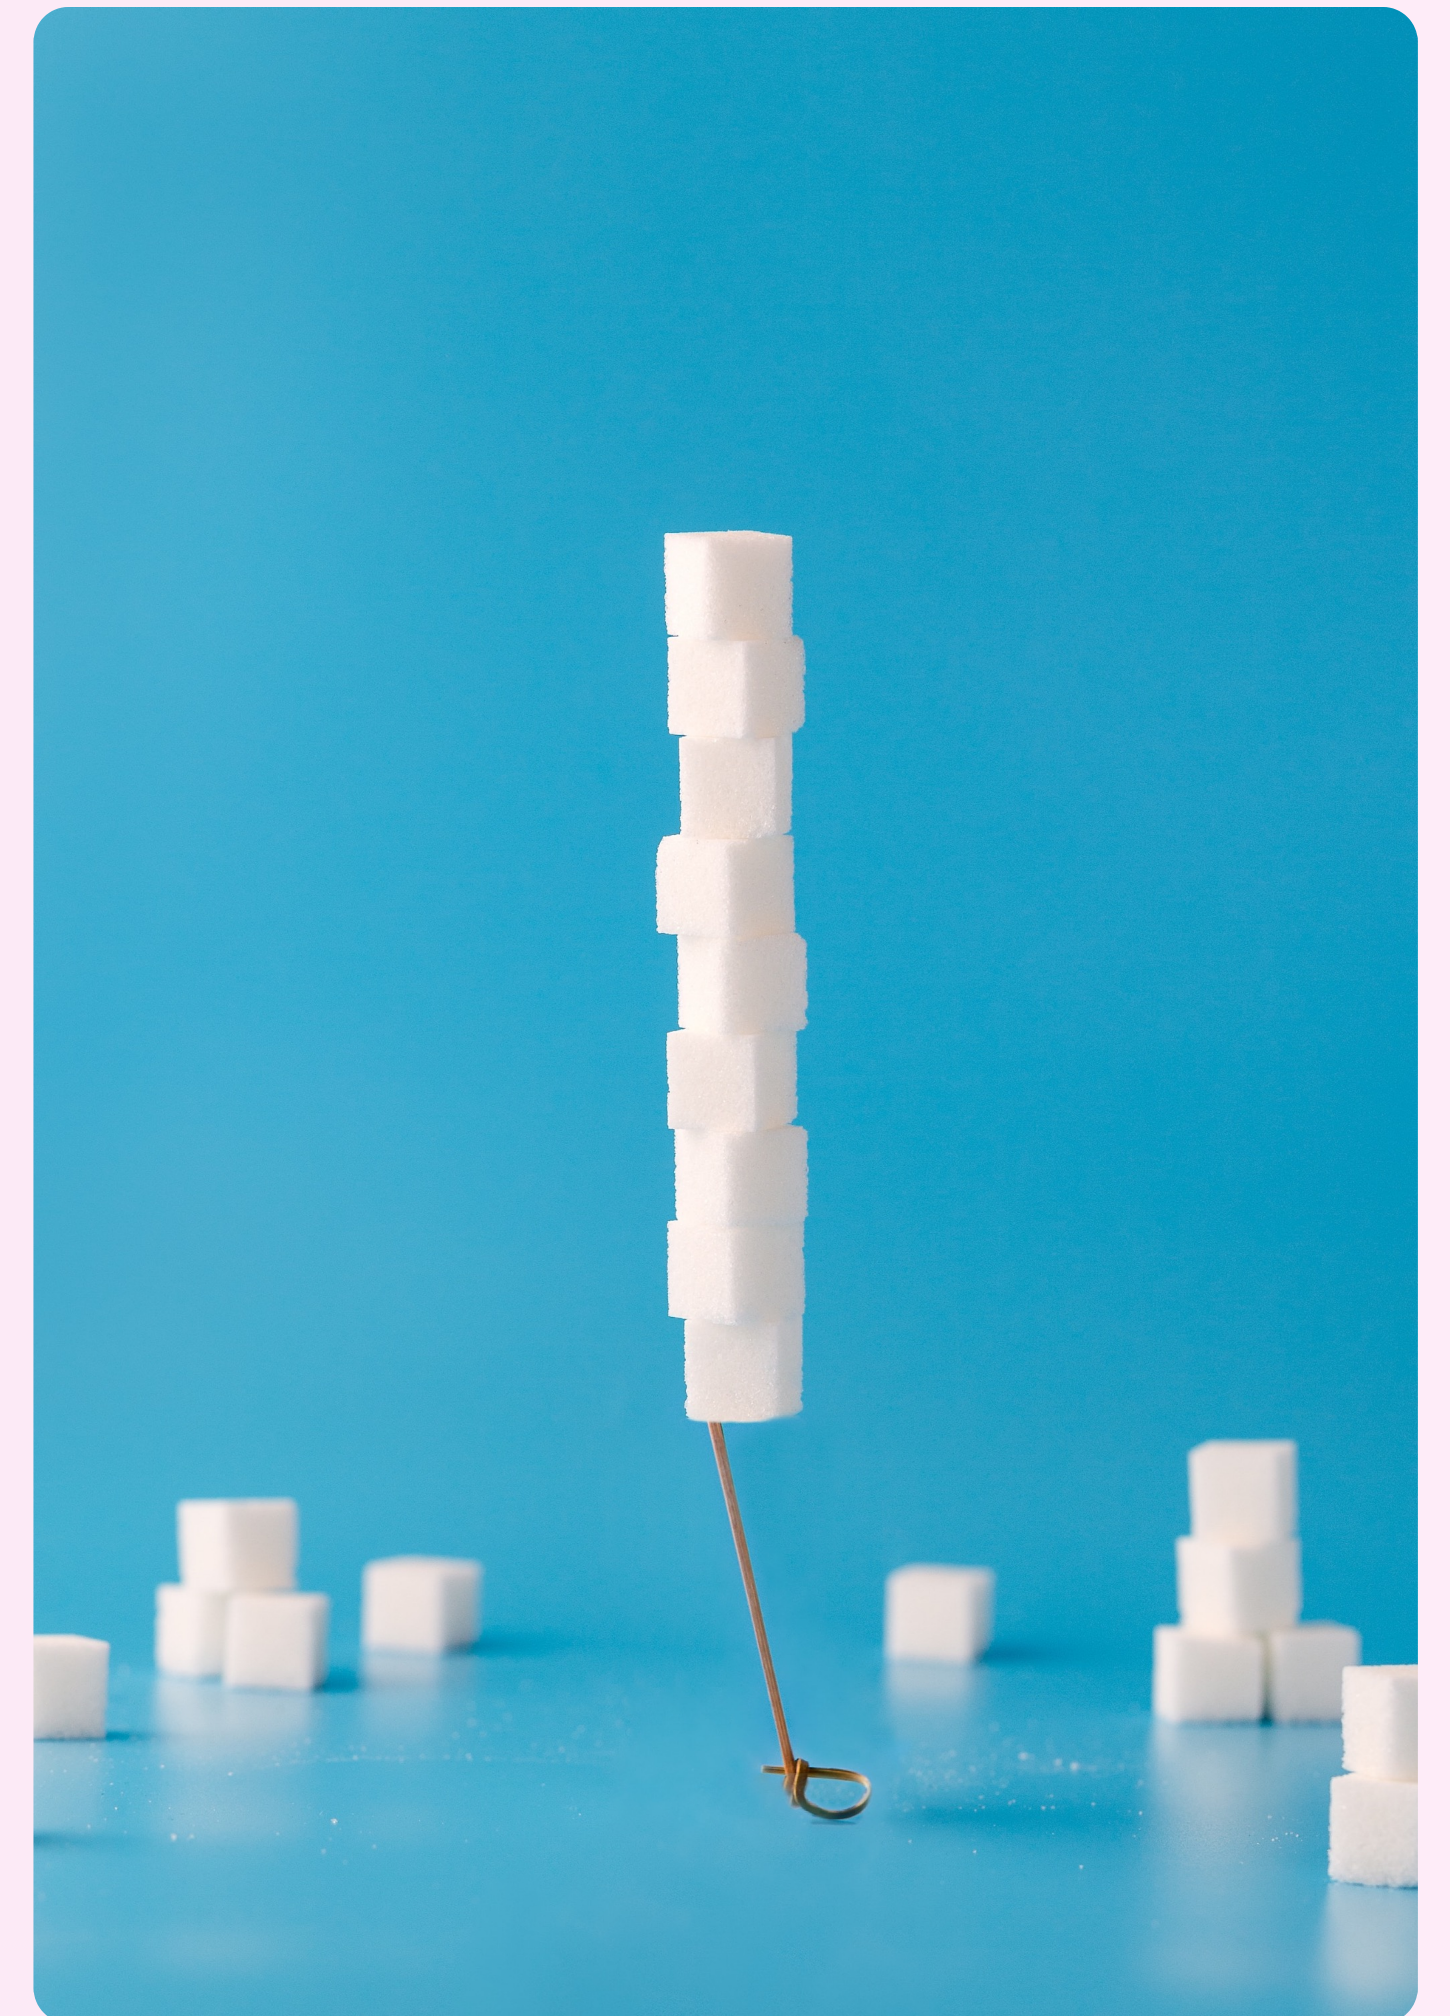

My client yesterday made me feel most satisfied. He started with me last month, exactly 30 days ago. He shared with me he can now walk for half an hour every day around at work checking on things, he could not do that month ago. He feels happier, suddenly his health problems seem improbable. His pain levels have gone from 9 to 6 in one month, he is able to drive without the pain from before, he has reduced some of his insulin from about 14 units to only 2 on some days under a nurse's supervision (his wife), his energy has risen and his brain is clearer at work he can remember facts better (he is 65). His blood sugar levels have improved considerably, he has lost more than 2 kgs and gout flare-ups are shorter and less severe. He is hoping for improved readings on his kidney function when he sees the specialist in another month or two. **An excited client after just 30 days.**

MY BLOOD SUGAR LEVEL DROPPED BY 50 POINTS!

I have very high blood sugar level despite medications I am currently taking. In a fasted state in the morning, I usually get blood sugar level between 160-230 mg/dL. My doctor's been telling me that it is miracle that I still maintain health despite such high sugar level. My daughter was introduced to MegaGen by her brother in law and experienced such positive effects that she recommended me to take it too. My daughter said she does not experience fatigue anymore and feels less tired after her long day of work. Her brain fog that affected her much was also disappearing. I thought I needed it more than her. After taking MegaGen to strengthen my bone for two weeks, I noticed that my blood sugar level was keep dropping. My fasted sugar level in mornings now dropped to 118-160 mg/dL level! Nothing could lower my sugar level this low. I am so excited and looking forward to experiencing more! Thank you, Pronuvia!

Y. S. KWAK - Age 71, Female, NYC

CALCIUM ION THERAPY DELIVERED ME FROM THE LAST STAGE OF PROSTATE AND COLON CANCER. AFTER 8 YEARS, I AM STILL CANCER-FREE!

In March of 2010, at the age of 60, I was diagnosed with prostate cancer, which had spread to the large colon. I had to remove the tumor from it surgically. One day in early July, I wrote up my last will for my children and family. I also stopped by Dr. Lee's lab to bid farewell as we have been friends for a while, and he introduced me to CIT and recommended me to take it. I did not know what it was, but I brought it home and took it as instructed. Up until that moment, because of prostate cancer, I couldn't urinate properly as it made urination very uncomfortable and difficult. But after taking CIT, I was able to urinate as if I was free from prostate cancer. Dr. Lee encouraged me to take CIT 3-4 times daily. A month later, to my disbelief, my blood test result indicated that my PSA levels dropped from 28 to 4, and I also felt great physically.

On August 20, I was getting ready to have ostomy surgery. Following my doctor's recommendation, I could not help it though the thought of it made me cringe. Arriving at the hospital on the day of surgery, Dr. Lee was there to pray for me. He left as I was escorted into the operation room for the procedure. However, when I woke up from anesthesia and realized that I had no ostomy bag on my belly, I was confused. I asked if the operation had not started yet or if there were any complications. The surgeon replied that there was no need to remove the rectum! Hallelujah! I could not believe my ears and immediately informed Dr. Lee, who was as happy as I was. In January 2012, I had another blood test, and the result came out normal with no traces of cancer. It felt like a dream. I am so thankful for Dr. Lee's development of CIT.

In January 2020, I am still healthy with no cancer!"

Mr. Cho, Male, 68, Surrey, BC, Canada

I RECOVERED FROM DEADLY HEART CONDITION! PRONUVIA GAVE ME NEW LIFE!

“I am impressed. Let me tell you my story. I obtained a Bachelor of Science from Ottawa’s Carleton University in Physics and Statistics, then I moved to Vancouver and completed Software Systems Development program from BCIT obtained Bachelor of Arts from UBC. Following an unexpected day-trading transaction in the year of 2006, I was hospitalized to learn that I had no heart attack. But I developed a Mitral valve prolapse hearth condition that in which the two valve flaps of the mitral valve do not close smoothly or evenly, but instead bulge upward into the left atrium. Therefore, any infection could kill me let alone not being able to run or walk with my son. I was required to take antibiotics prior to any of my dentist appointments. I was a sprinter in my high school years but then I could not climb the stairs or run. I tried different treatments but none of them worked. My heart pain continued and the Richmond Cardiologist, Dr. Broumand, told me that my life stopwatch started and I was dying.

I was introduced to Pronuvia’s scientific discoveries and innovation during the winter of 2010. On or about Spring of 2011, I tried some of the Calcium Ion therapy products and I immediately felt the increase of my energy.

Three months after taking CIT I began walking on my treadmill. Initially I walked for 15 minutes but after 2 months I began jogging. I explained the results to my brother and sister and they started taking CIT as well. My brother was suffering from excruciating pain of arthritis rheumatism that began misshaping his finger’s joint. After two months of CartiGen intake, his pain was gone and my brother’s finger is back to normal. My sister complained about her lack of energy and getting ill frequently. Following Dr. Lee’s suggestion my sister began taking MegaGen, and she felt 20 years younger and she is as grateful as I am for Pronuvia products.

Amongst many of whose lives were changed from degenerative diseases to become healthy following CIT intake, I met a 75 year old gentleman who was cured from Prostate cancer. I met a 25 year old professional software developer who suffered incurable back-pain but was very healthy and energetic following CIT. Not only that my health has changed to better drastically after taking CIT, I am a believer that millions of people have the right to benefit from the same so we live in a better world.”

NO MORE VITILIGO! YEA!

After taking MegaGen for one month, vitiligo the size of the my palm on abdomen gradually disappeared and was entirely eliminated after taking MegaGen for three months. What is this thing?!

Youngja Baek, Age 55, Female

MARAGEN STOPPED PAINFUL SHINGLES AT THE ONSLAUGHT!!!

Dreaded shingles started from my hands and the rash and blisters started to spread. When I visited my doctor, he told me that it will spread up my arm riding nerves. I have heard about the power of MaraGen and started taking it immediately. All the blisters on my hand dried up in a few days and dropped the curtain on shingles breakout! Thank you!

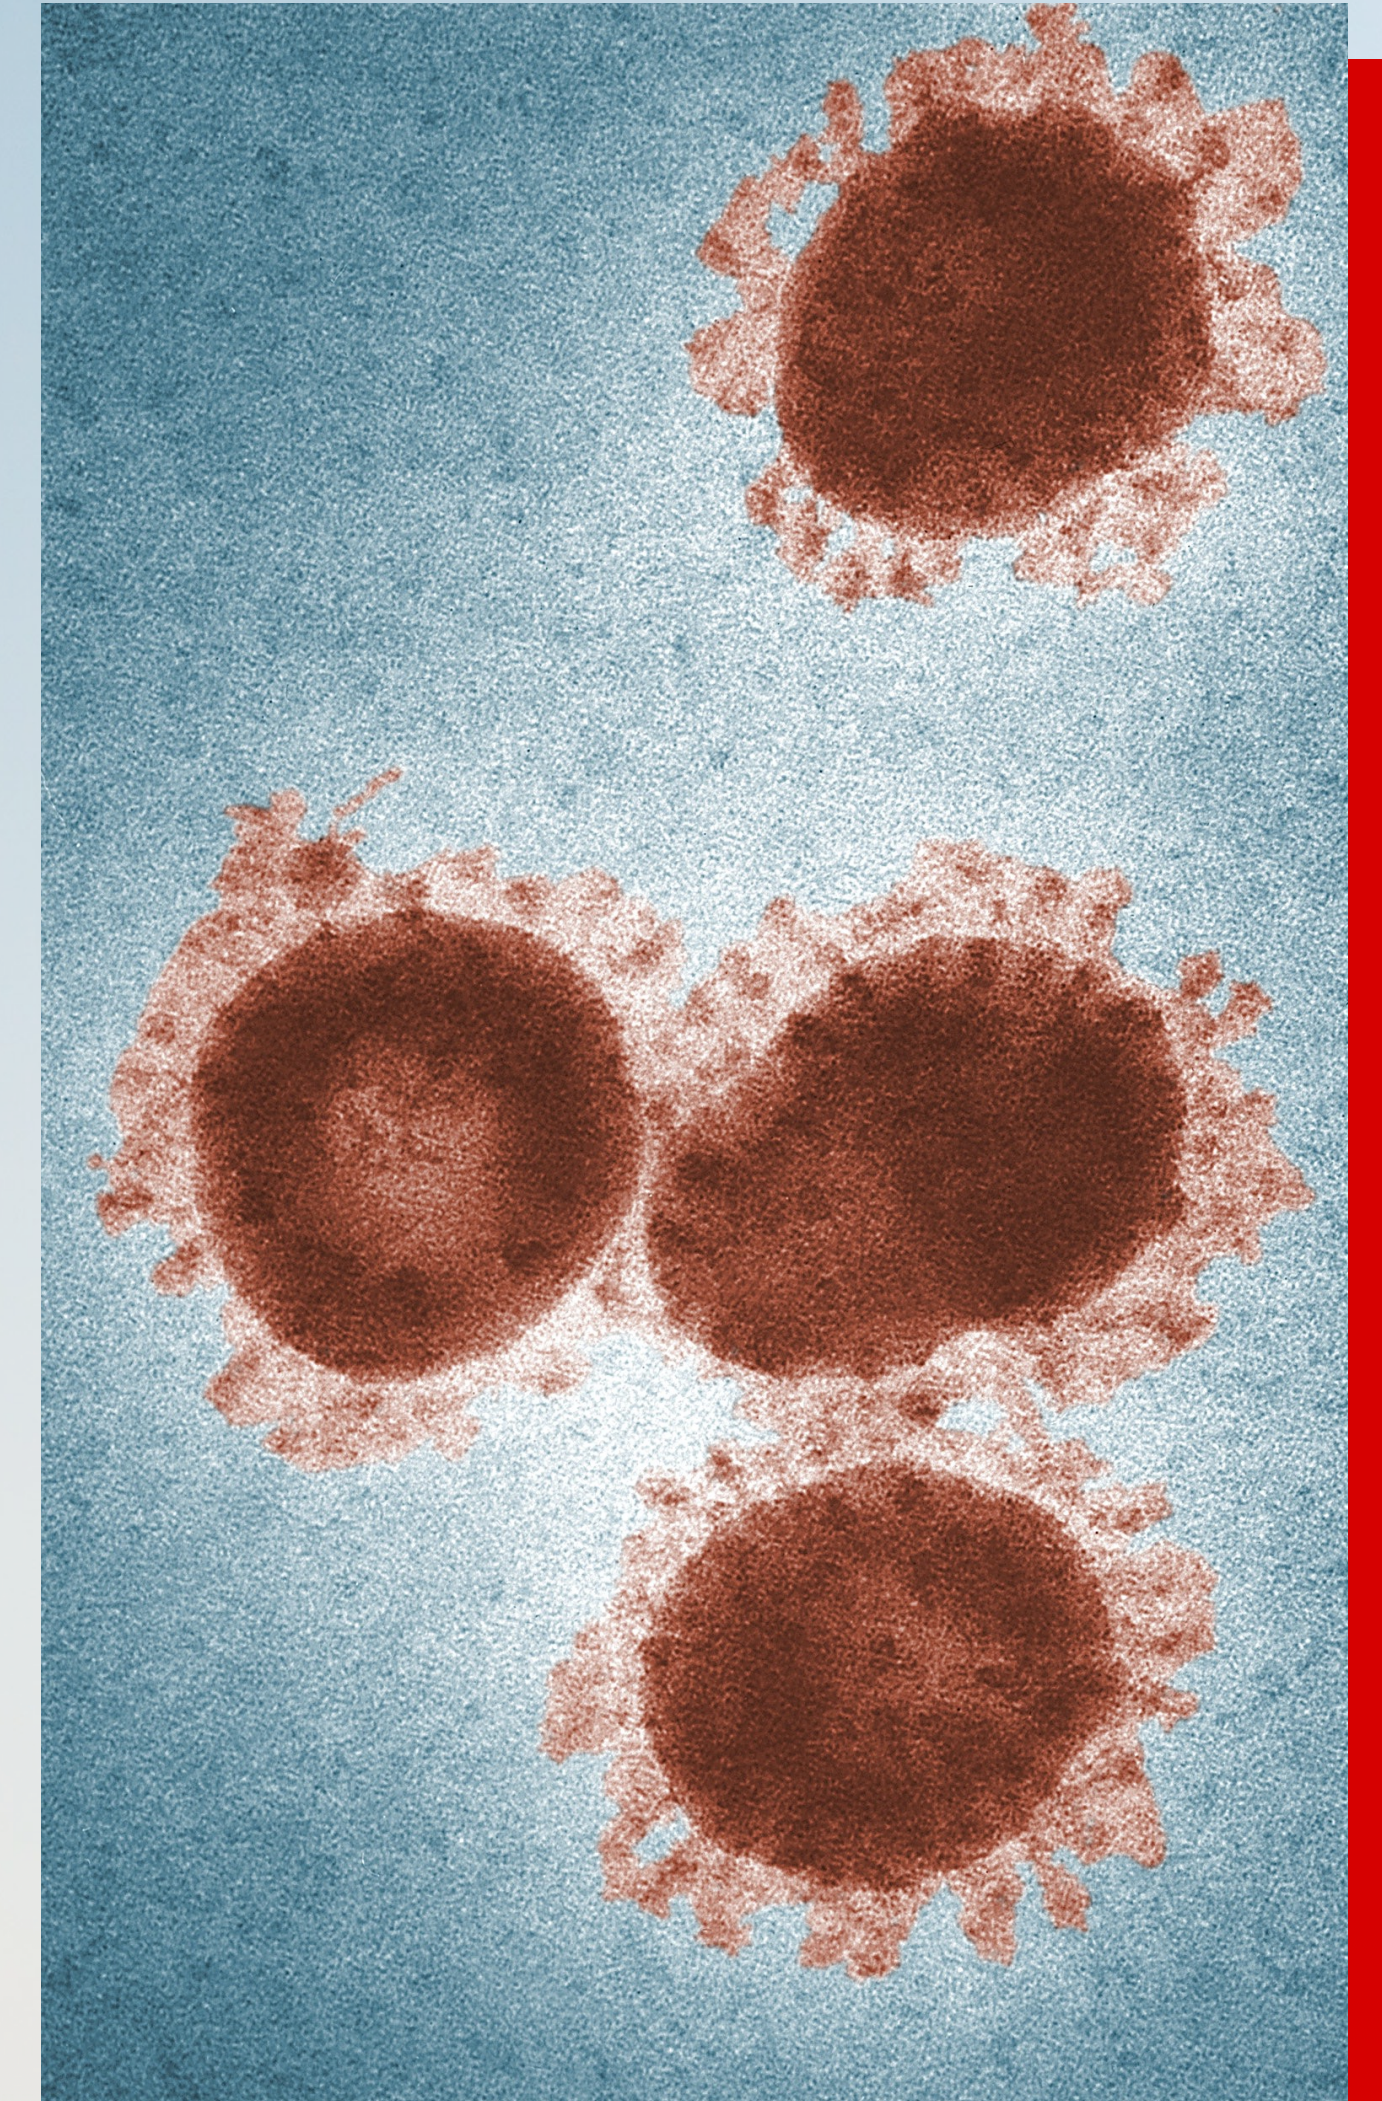

M. Park - Age 60, Female, Vancouver

VIRUS INFECTION (MERS)

“A high school student with aplastic anemia was going through a rough patch because the only available treatment option for his condition was bone marrow transplant. However, after being introduced to Calcium Ion Therapy, he fully recovered from aplastic anemia. After graduating from college, he got a job at a hospital as a phlebotomist around 2015 when there was a MERS epidemic in South Korea. His team, who received and diagnosed MERS patients, were all quarantined due to MERS infection, except this young man. It was a mystery to all his colleagues why only he escaped MERS contraction when he was at the riskiest position of drawing the blood of MERS patients as a phlebotomist. The only difference was that he was still taking Calcium Ion Therapy at a maintenance dosage.”

Testimony about a patient by Dr. Paul Lee

MY DAD'S DEBILITATING COPD GOT MUCH BETTER WITHIN A WEEK WITH MARAGEN!!

"I have good news to share!

This is about my coworker who heard about Calcium Ion Therapy from me. Several months ago, she took Megagen and her irregular periods became regular. However, she was still skeptical if it was truly Megagen that helped her. Although she was experiencing CIT's effect first-hand, she was still doubting if mere 'supplement' could resolve such difficult health issues.

Then about two months ago, her father's lung condition worsened (COPD), and with difficulty in breathing, he could not move much, sleep at night, nor even eat properly. Whether sitting down or lying down, he fought for breath for the past two months. In agony, her father even desired death over life. He suffered tuberculosis 20 years ago and also suffered from chronic asthma for which he had taken medications for many years with diminishing efficacy.

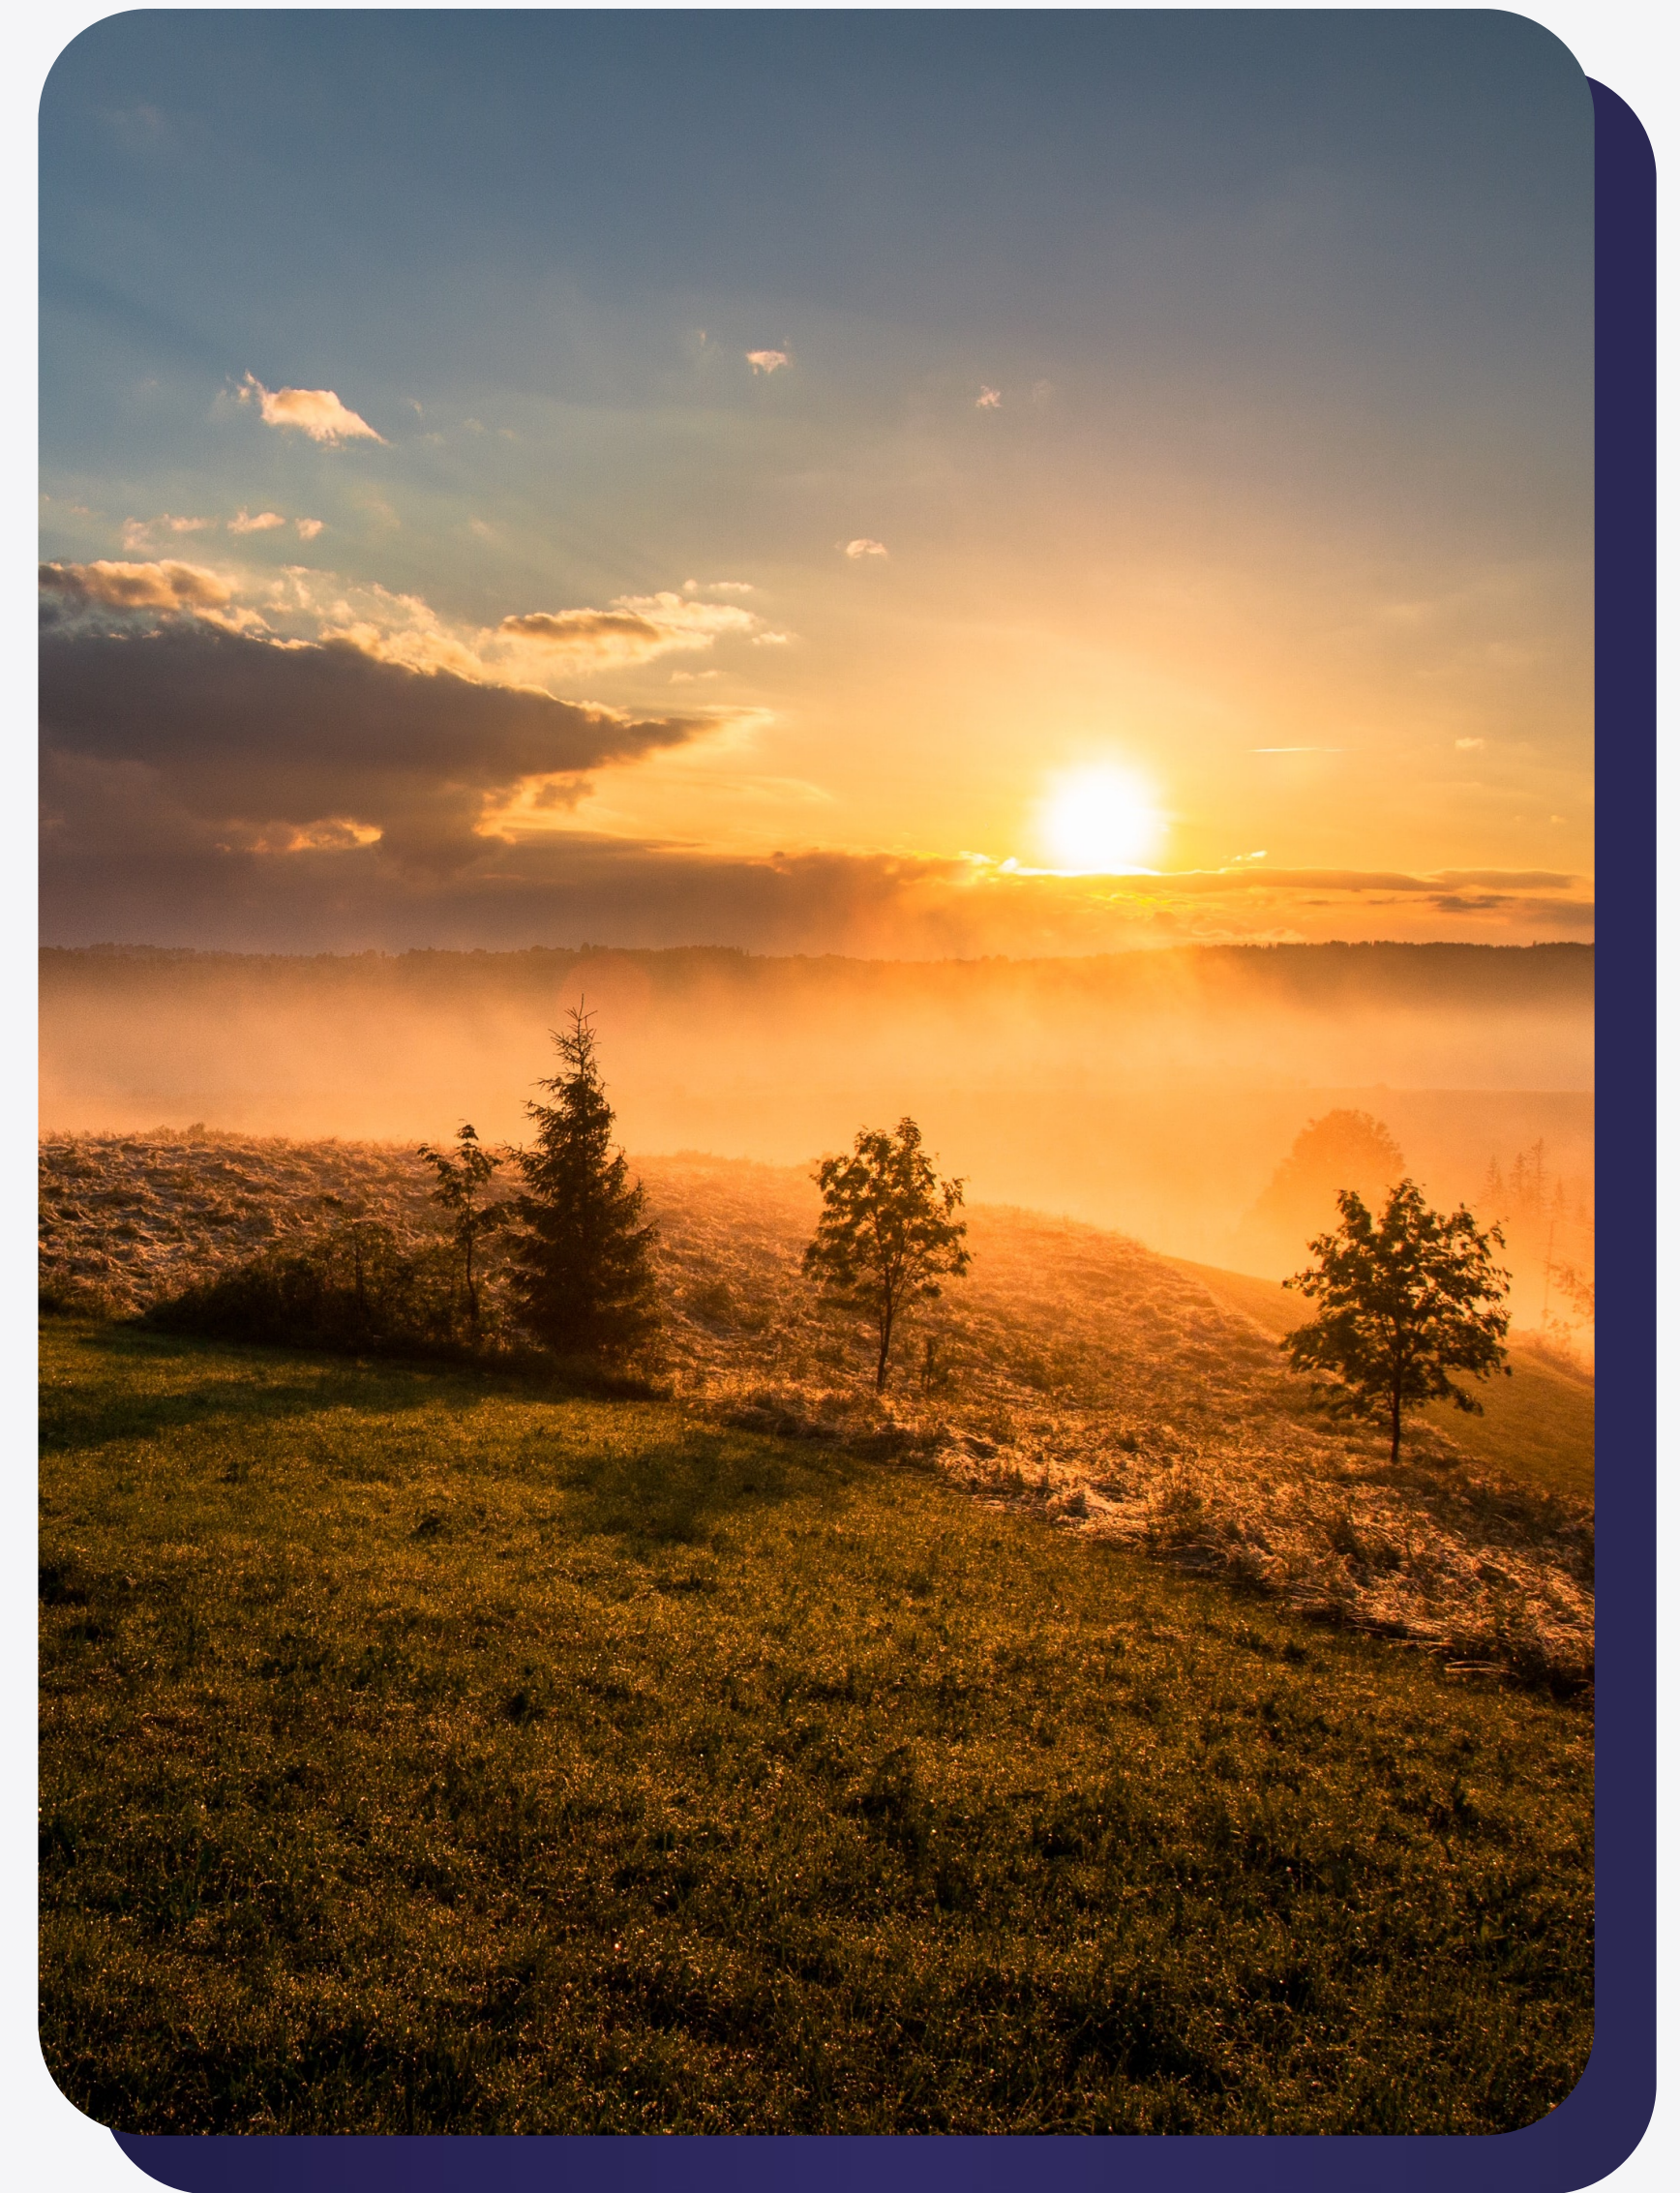

While she was contemplating getting an oxygen tank for her father, she read more about CIT producing promising results for patients suffering from COPD and called me to confirm. I told her about my father's lung cancer getting better using Maragen, and immediately, she managed to get Maragen for her father to try. About four days later I called her father to ask about his condition, and to my amazement, I learned that he no longer fights for his breath, is now active enough to visit senior centers, and sleeps much better. When asked if he got any other medication other than Maragen, his answer was no. My friend is in shock learning about such dramatic effects Maragen had on her father. She used to brush me off when I shared about my own father's recovery from lung cancer with Maragen, but she is now a believer!

HIV CASES

“We had several patients who have taken Calcium Ion Therapy for HIV cases and the result came out good. For instance a patient in Tanzania, Elijah, who was then 64 years old, had viral load of 2380 which came down to 75 in only about a week. In Kenya, there was a 6-year-old boy named, Thomas, whose viral load came down to 20 from 2450. In Canada, an Asian male named, Mike, who was 62 years old then, had viral load come down to 50 from 2300.”

Testimony about three patients by Dr. Paul Lee

AN INSOMNIA CASE

A 60-year-old male had suffered from insomnia for more than 50 years. Ever since his childhood years, strangely he could not fall asleep and continued to turn on his bed all night, keeping his parents up as well. His lifelong wish was to sleep sound just for one full hour. He had tried every treatment available from what western to eastern medicine have to offer in treating insomnia but to no avail. Then from his shoulders down to his arms, he experienced numbing like paralysis. Only after pounding and massaging arms he could gain some senses. His head felt foggy all the time, and to ease the misery he constantly drank liquors which aggravated his conditions more.

One day, a good friend of his introduced him to Calcium Ion Therapy. After taking the first dose, in his head, he felt like a big ice block melting in strong sun rays and then found himself waking up refreshed the next morning. He said he never slept like that all his life and never felt that good waking up refreshed after sleeping. His depression subsided with the treatment and he felt as if he was living a new life. It's been 30 days already and he still sleeps well, experiencing a total renewal in his life.

He told me, "I still cannot believe this is really happening to me. All my friends are amazed, too. I think God sent me an angel. Even my shoulders and arms have regained senses. I have written thousands of poems through those sleepless nights, but now I am looking forward to how my poems will change after sleeping through the full nights.

Testimony about three patients by Dr. Paul Lee

I AM 70 YEARS OLD AND CIT REVERSED MY OSTEOPOROSIS! INCREDIBLE. THANK YOU!

I am now 70 years old, born in the year 1950. Since my diagnosis of osteoporosis, I had taken osteoporosis drugs for two years. Then around December of 2018, I started taking MegaGen once a day for four months before taking a bone density test on March 16th of 2019, only out of curiosity. However, finding out that there weren't many improvements, I switched over to the stronger product, MaraGen, and faithfully took it for the next ten months, twice a day (morning and evening) with regular exercise.

Then today, January 14th of 2020, I took another bone density test, and to my amazement, my hip joint reading showed within the normal range. What a miraculous restoration from osteopenia! Moreover, my spine showed significant improvement from osteoporosis to osteopenia. I am so grateful for such an incredible recovery and writing this post to thank the inventor, Dr. Paul Lee, personally. I am now confident of the Calcium Ion Therapy will gladly continue and also recommend it to others!

H. Y. Lee - Male, 70, Korea

DIZZINESS AND TINNITUS DROVE ME MAD. AIC MADE IT DISAPPEAR LIKE MAGIC. (MENIERE'S DISEASE CASE)

Tinnitus and spinning dizziness (vertigo) began about 10 years ago. In desperation to get better, I have visited and saw specialists of every hospital and clinic in my area and tried all the available treatments without any success. Living was torture whenever ceilings and surroundings begin to spin and I throw up. Sometime ago when vertigo hit me while I was driving, I had to stop the car in the middle of the road and wait until cops showed up. The condition continued to deteriorate, and I was afraid of even getting out of bed. My ears were also ringing with all sorts of sounds incessantly.

Then one day this winter, my wife invited a guest who was staying in a nearby hotel. When he came to see me, the first thing he did was listening to my chest through a stethoscope, felt my wrist and then mixed a spoonful of liquid (Maragen) into a cup of water and made me drink it. He also put some of the mixed liquid into a portable nebulizer and put it right next to my right ear. He then simply left my house and I fell asleep.

When I woke up the next morning at 6 a.m., I realized that I had no spinning dizziness. I used to have vertigo when I woke up in the morning without fail. Amazed and in disbelief I went out for a morning stroll. For the first time in a long time, I could actually go outside and enjoy a morning stroll. I am now living a new life, and it feels like a dream!!

SCOLIOSIS SURGERY POSTPONED AFTER MARAGEN TREATMENT

A Doctor's Anecdotal Note: My patient of age 60 has severe scoliosis of the spine and seen by many spinal surgeons who insist she must have surgery to put in plates and screws to prevent further collapse on spine. As she was already menopause, she would also need Prolia injection every 6 months to increase her bone density so that the screws would not be loosened. Her surgery was scheduled for January 2019. I started her on Maragen in October last year. To my surprise she could feel her spine stronger after only 1 week. She has cancelled her operation and introduced her sister to take Maragen

Anonymous - Age 60, female, Singapore

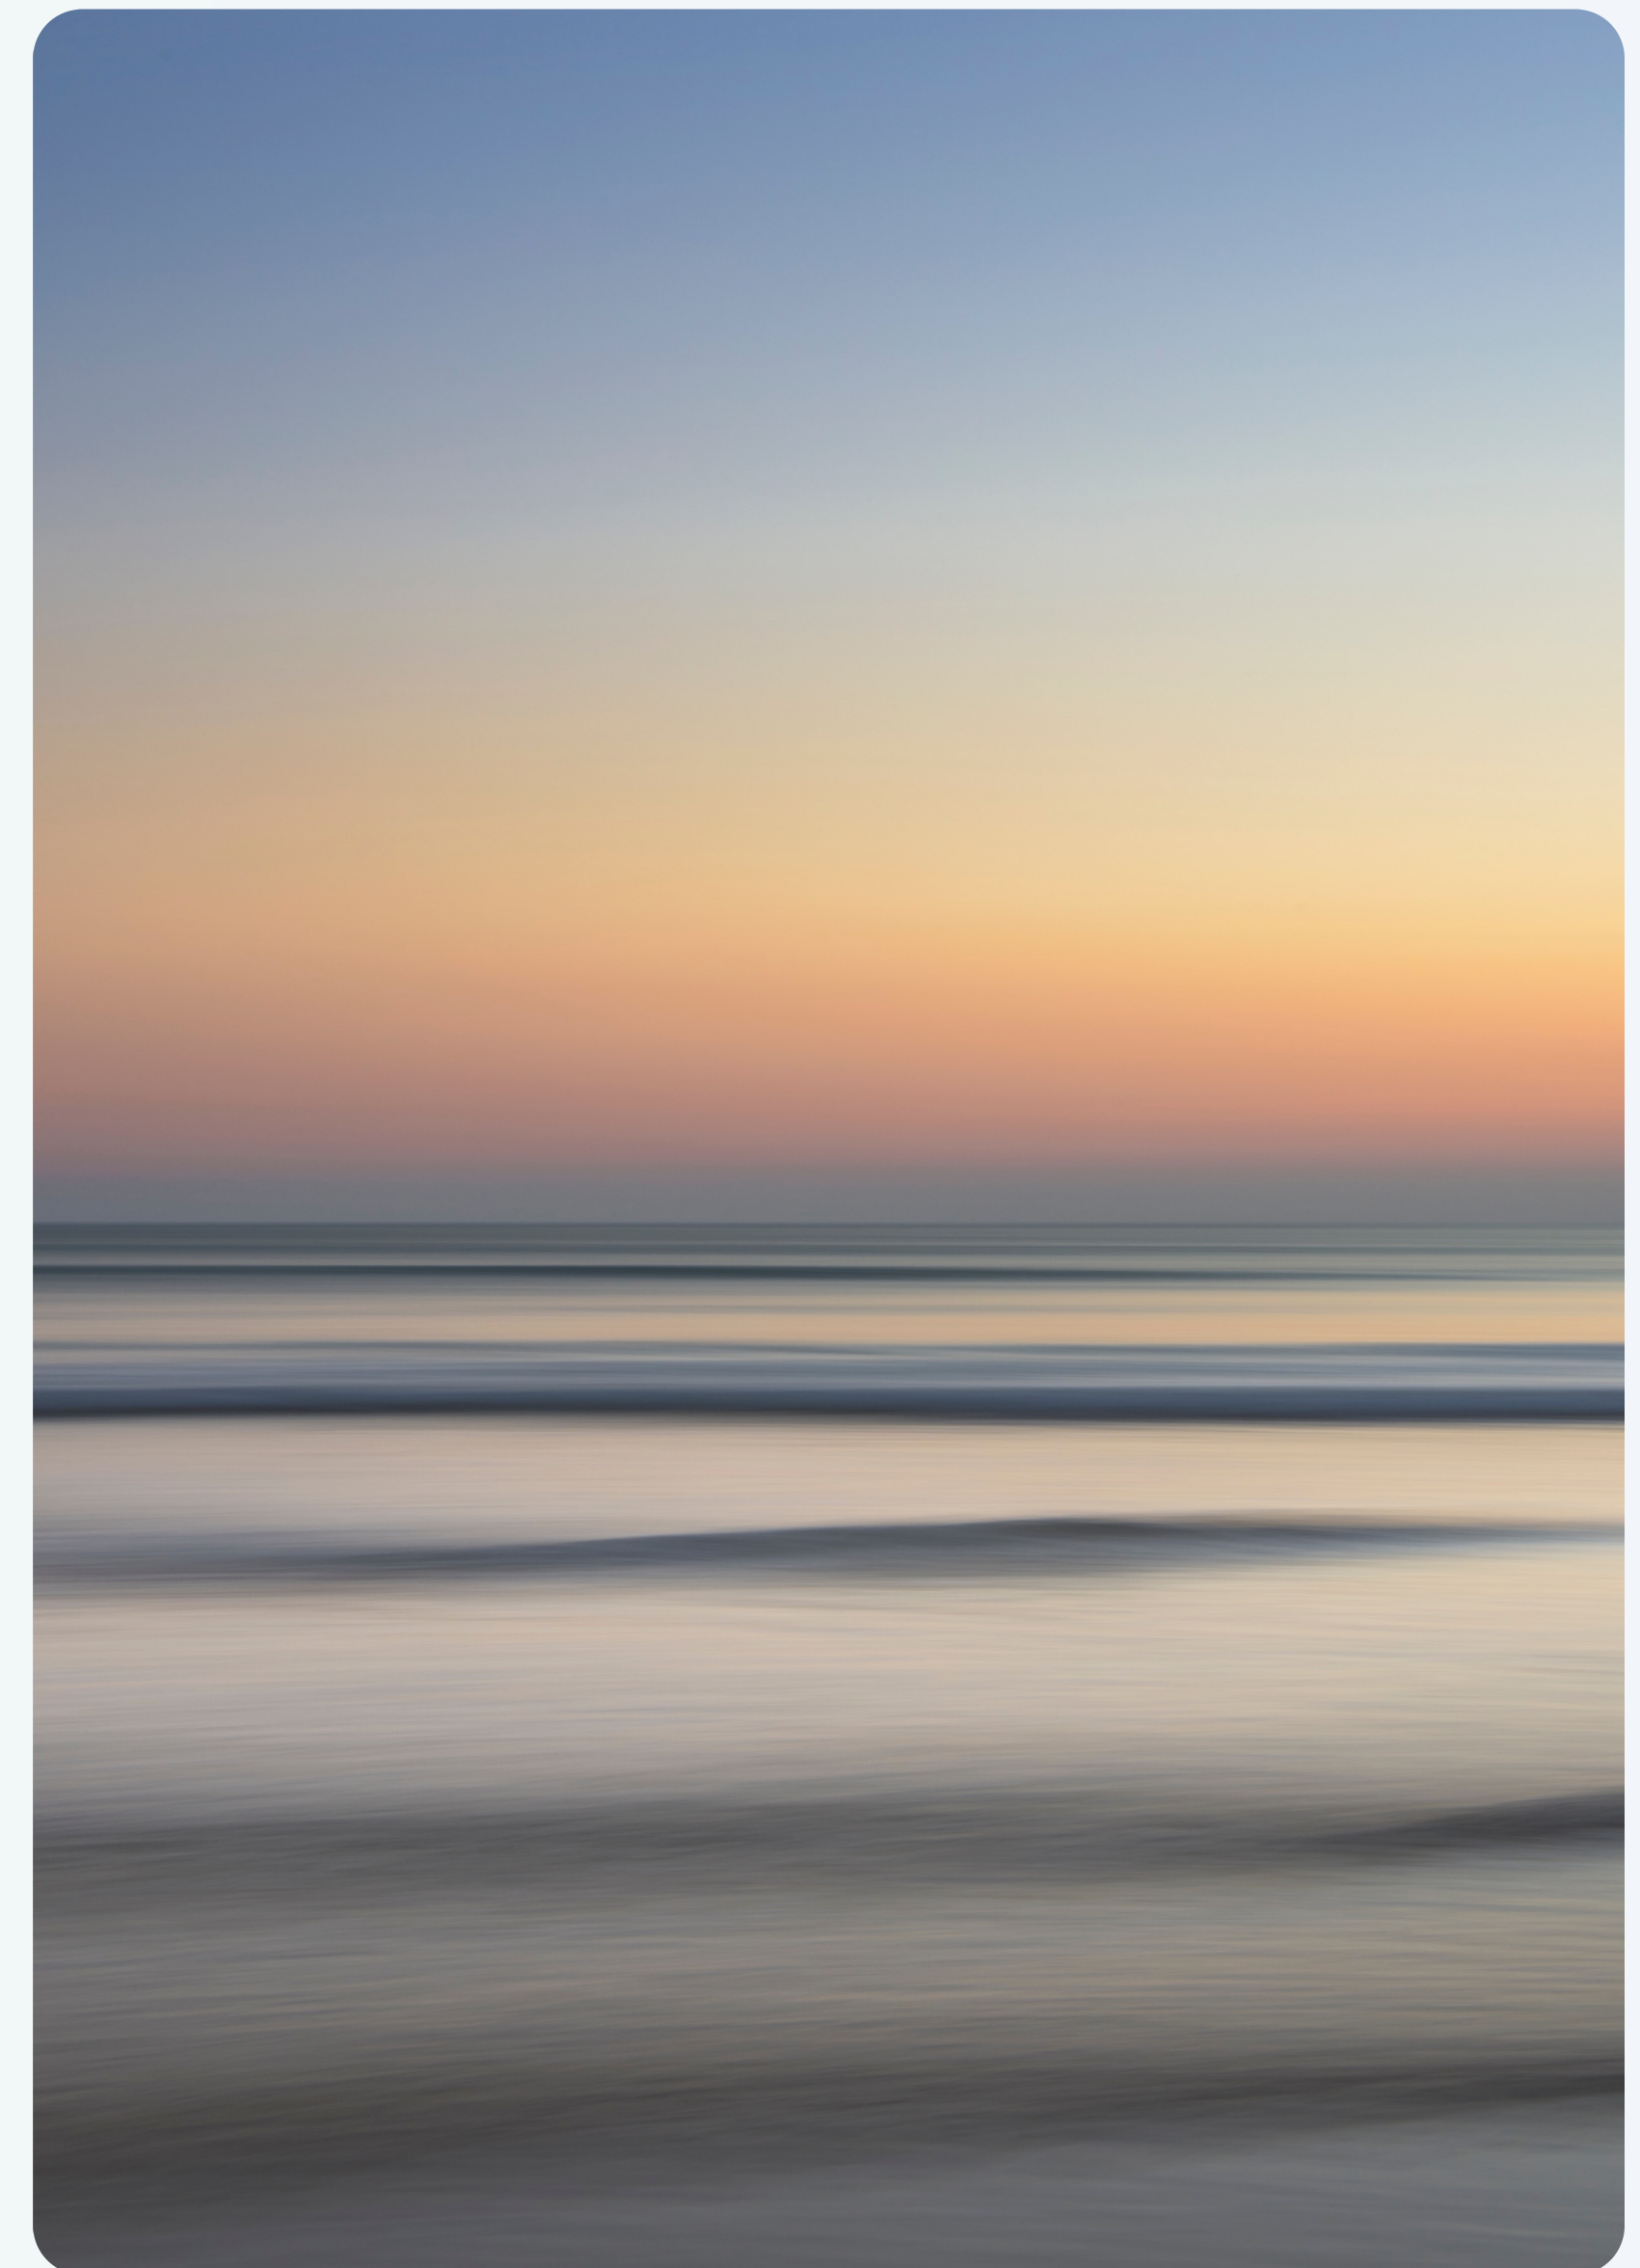

AUTISM, ADHD, PANIC ATTACKS

“After taking Calcium Ion Therapy, a 17-year-old autistic teenager who had had no conversation with his mother started to make comments like “Your new hair looks good!” when his mother walked in with new hairdo from hair salon. The entire family atmosphere brightened up”.

“A first-grade elementary school child with ADHD had never sat at his desk more than five minutes. However, after taking Calcium Ion Therapy, he reads books for more than half an hour and wanted to continue reading instead of playing outside!”

“A woman in her 50’s who was suffering from panic attacks stayed in her room most of the time and did not go out. After taking Calcium Ion Therapy, she now lives a normal life. Once she visited me with home baked cookies and thanked me.”

Testimony about three patients by Dr. Paul Lee

MARAGEN DELIVERED ME FROM TWO YEARS OF WEEKLY TRANSFUSION. MY MARROW NOW GENERATES MY OWN BLOOD!

I have been getting blood transfusion every week for the past two years because my bone marrow can no longer generate new blood cells. The quality of my life was deteriorating due to constant suffering and weariness. Then my Iranian friend recommend me to take MaraGen. I couldn't help being skeptical at first since I have been in living in despair for all this time with no real help offered from medical world for my condition. However, learning of his own miraculous recovery from critical heart condition through MaraGen, I had to give it a try. I started to take MaraGen three times a day for a month and then noticed diminishing symptoms of anemia. Surprisingly, the next blood test revealed that my marrow began to make new blood of my own!! Ecstatic and regaining hope, I can now feel that I am returning to normal health. I recently stopped receiving transfusion, escaping the misery of weekly transfusion! I am so grateful for Marah Natural and also for my friend who introduced me to this miracle supplement. I am convinced that I am on the road to full recovery. (July, 2017)

Namkyu Park - Age 48, Male, BC, Canada

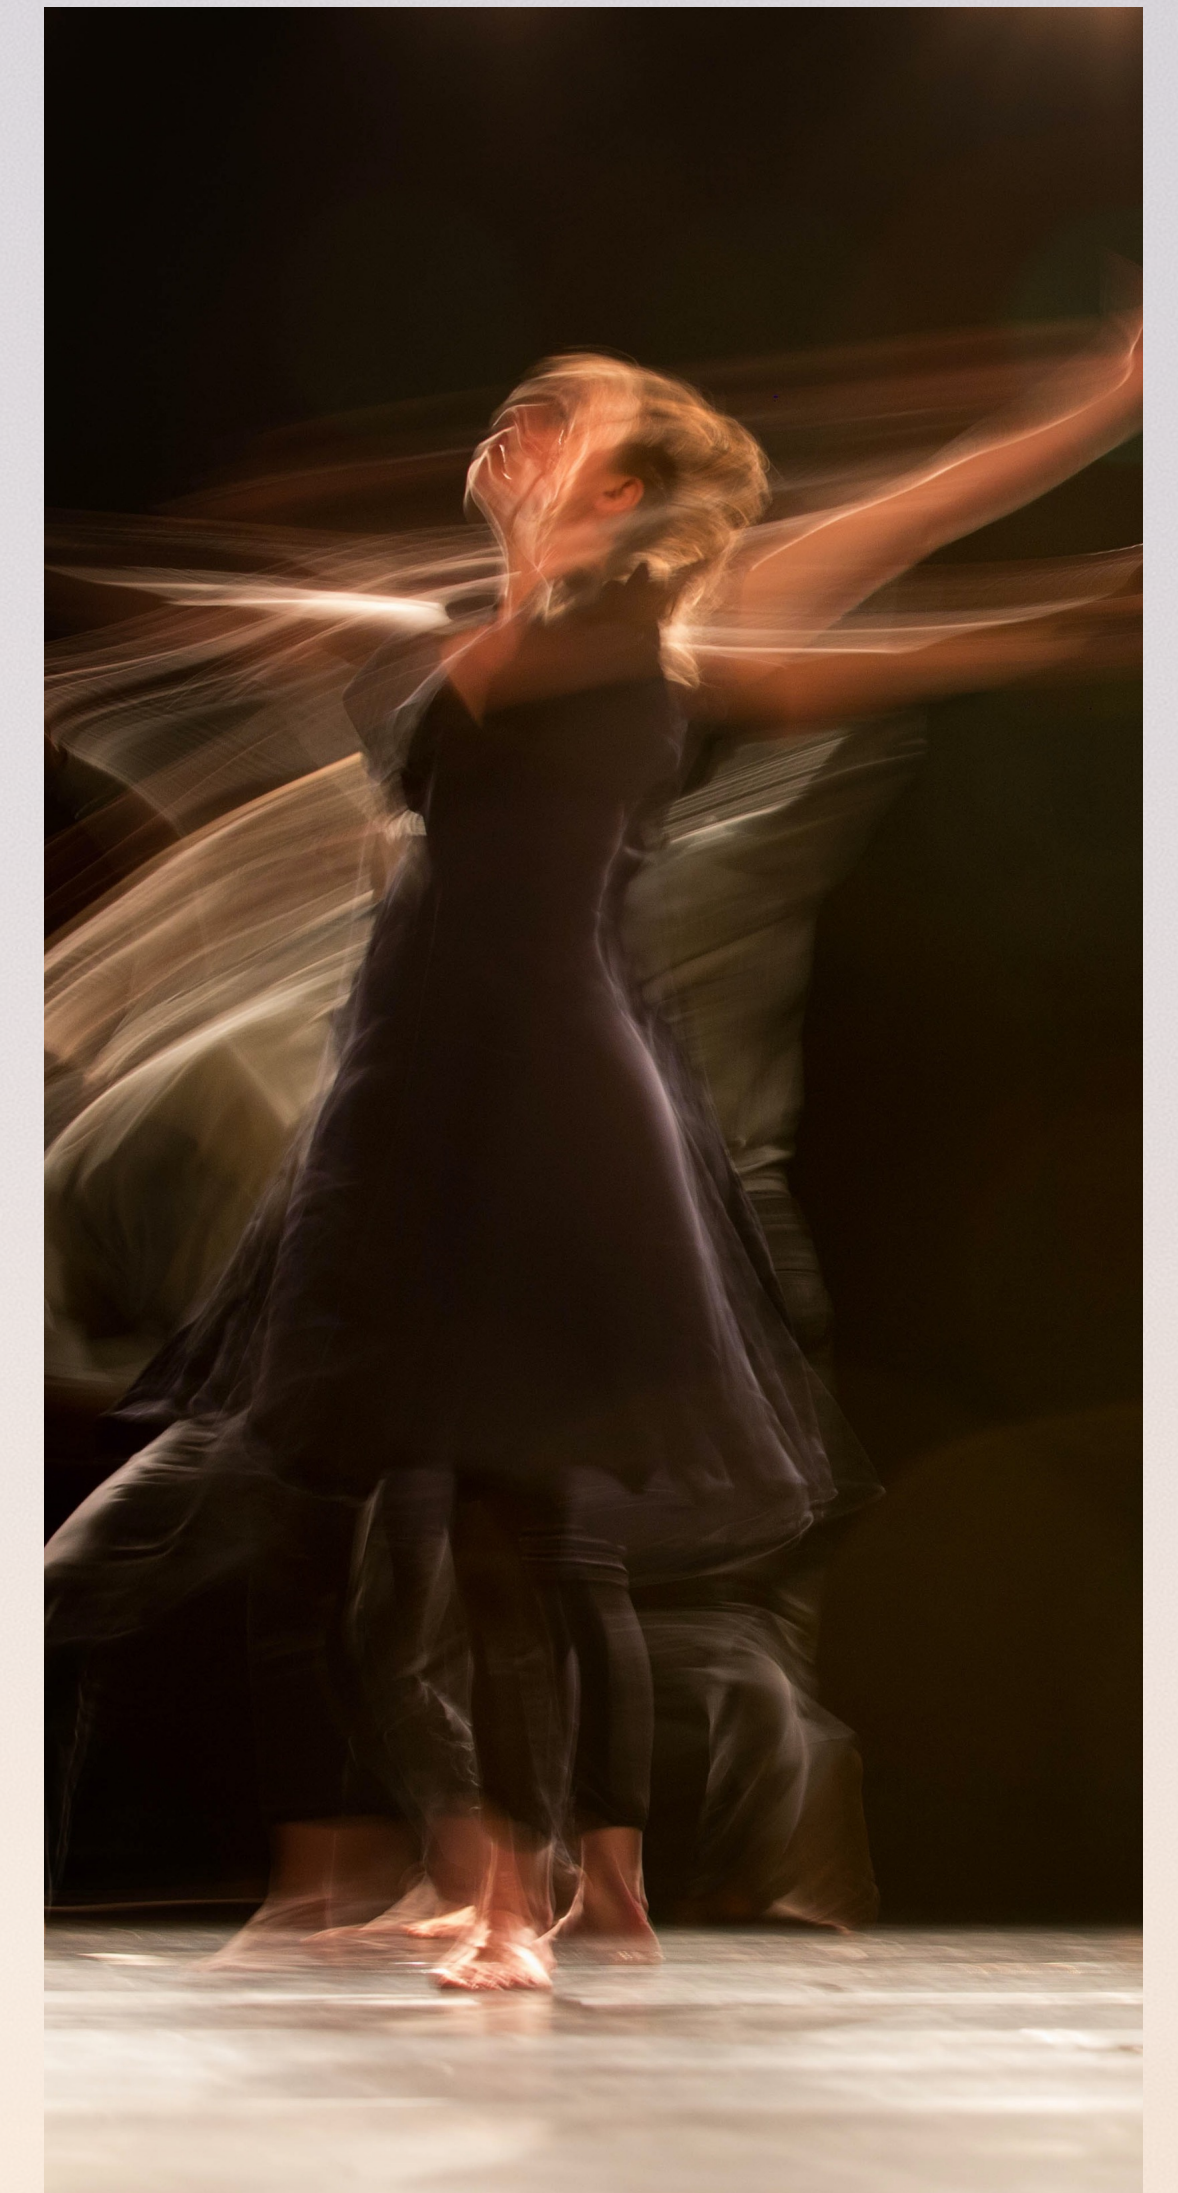

FIBROMYALGIA CASE

Not too long ago, I started to feel pain around my body and could not sleep soundly. I thought it was caused by running after my rowdy kids. However, instead of symptoms going away with rest, it was getting worse, keeping me from getting good sleep due to felt pain all around my body. When massage sessions and acupuncture did not help, I visited my family doctor last summer. Revising the clinic after the initial blood test, he prescribed pain relievers and muscle relaxants, which did not alleviate the painful condition much. I became cranky and naggy and made everyone in my family miserable.

My family doctor recommended me to a specialist who prescribed me a new medication, saying how an abnormality in the muscle fibers caused the pain. (Fibromyalgia) The medication helped a bit, and I was relieved as I could sleep better. However, maybe a week had passed, my back started to hurt again, soon spreading to my whole body. The pain disrupted every part of my life, and I began to think whether living like this had any meaning.

Then, one day I heard about miraculous healing stories of Calcium Ion Therapy and, in desperation, decided to try it out. I don't know how much I slept after taking CIT. I have never slept so deeply for a long time. It helped alleviate the pain, and I am writing this to thank you for the excellent therapy. Now freed from pain, every day is a gift. Thank you~

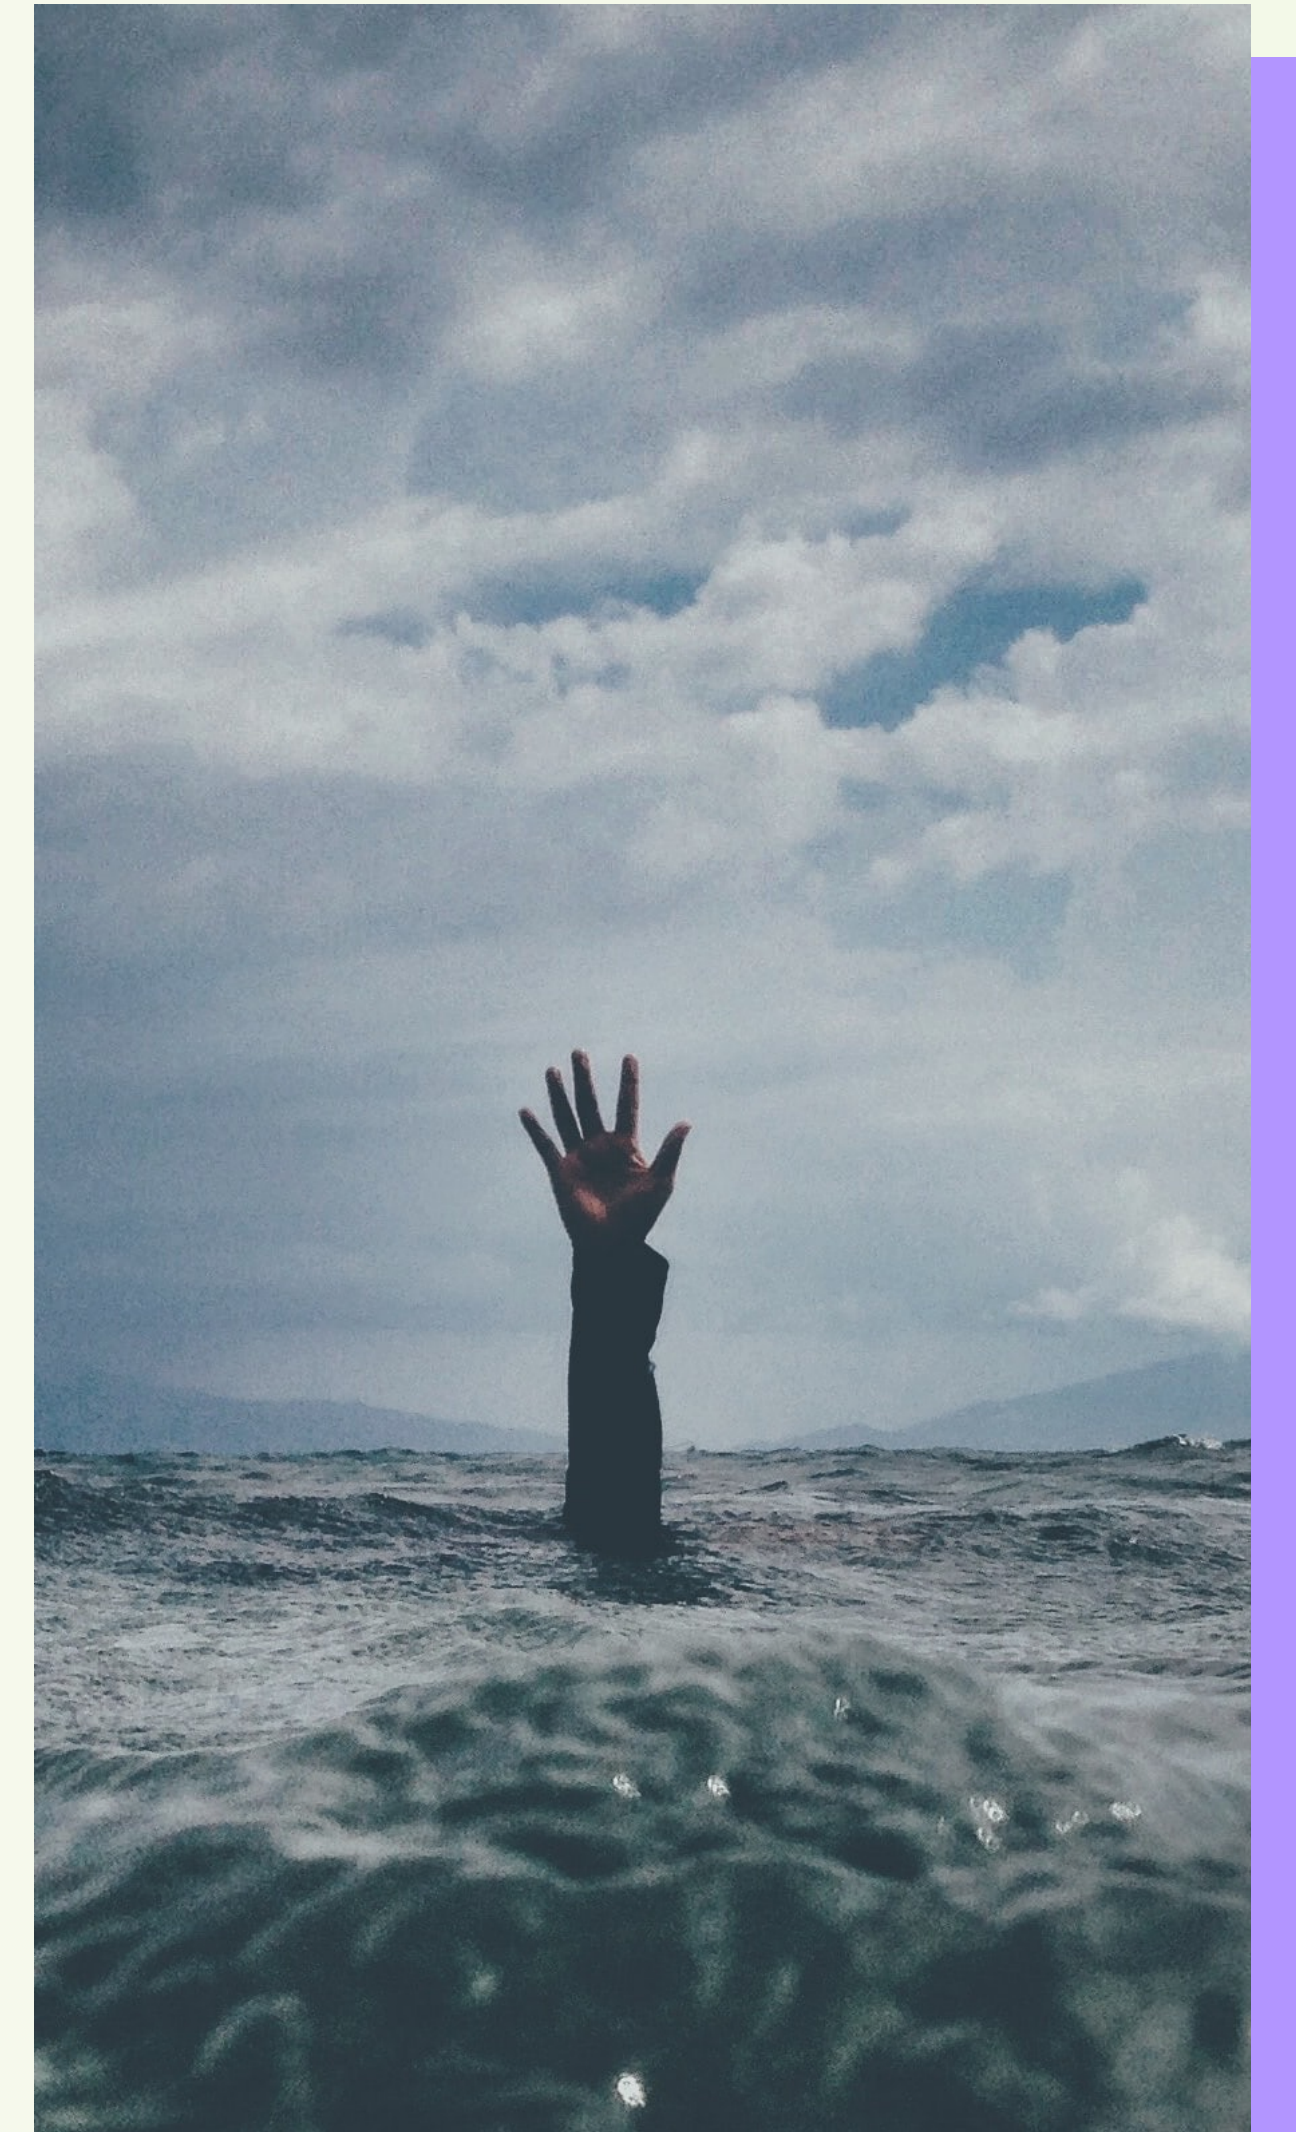

Mary Kim, female, 43, Vancouver, Canada

MARAGEN DELIVERED ME FROM 15 YEARS OF PAIN IN MY HANDS!

After moving to Xi'an, China in 1997, my delicate hands suffered much. There was no running hot water in my house and I had to run my hands through very cold water every day. Plus, I also had to carry heavy bags every day. 4 to 5 years this repeated routine took toll on my hands. For 15 years, the pain would keep me from writing and doing anything with my hands. Every night before I go to sleep, I have to wrap my fingers with pain relieving patch. It only gave me temporary relief. Then a guest who was visiting me heard of my plight and recommended that I try MaraGen. My goodness! MaraGen took away my pain which was there for more than a decade. This can't be anything else but MaraGen! I am so thankful!

Eunjoo K. – Age 56, Female, Xi'an, China

PPS (POST POLIO SYNDROME) ALMOST PULL MY LIFE DOWN, BUT WITH MARAGEN I AM WALKING STRONG AGAIN!

I spent sickly childhood after suffering polio. I thought polio was once in a lifetime thing which will never haunt me again. However, I could not believe the nightmare is back when I was diagnosed with Post Polio Syndrome (PPS). My legs began to lose leg strength to the point I dreaded going to the bathroom. Thoughts of stopping the work I enjoyed was devastating. I questioned if there was any hope left. However, I was recommended to try MaraGen by my sister-in-law (pharmacist) in Korea last spring (2016). I was not fully convinced but decided to take it anyways. By summer I had enough strength in my legs to take a trip to South America. Now, I can go to a bathroom without any difficulty and am still working! I am so thankful!

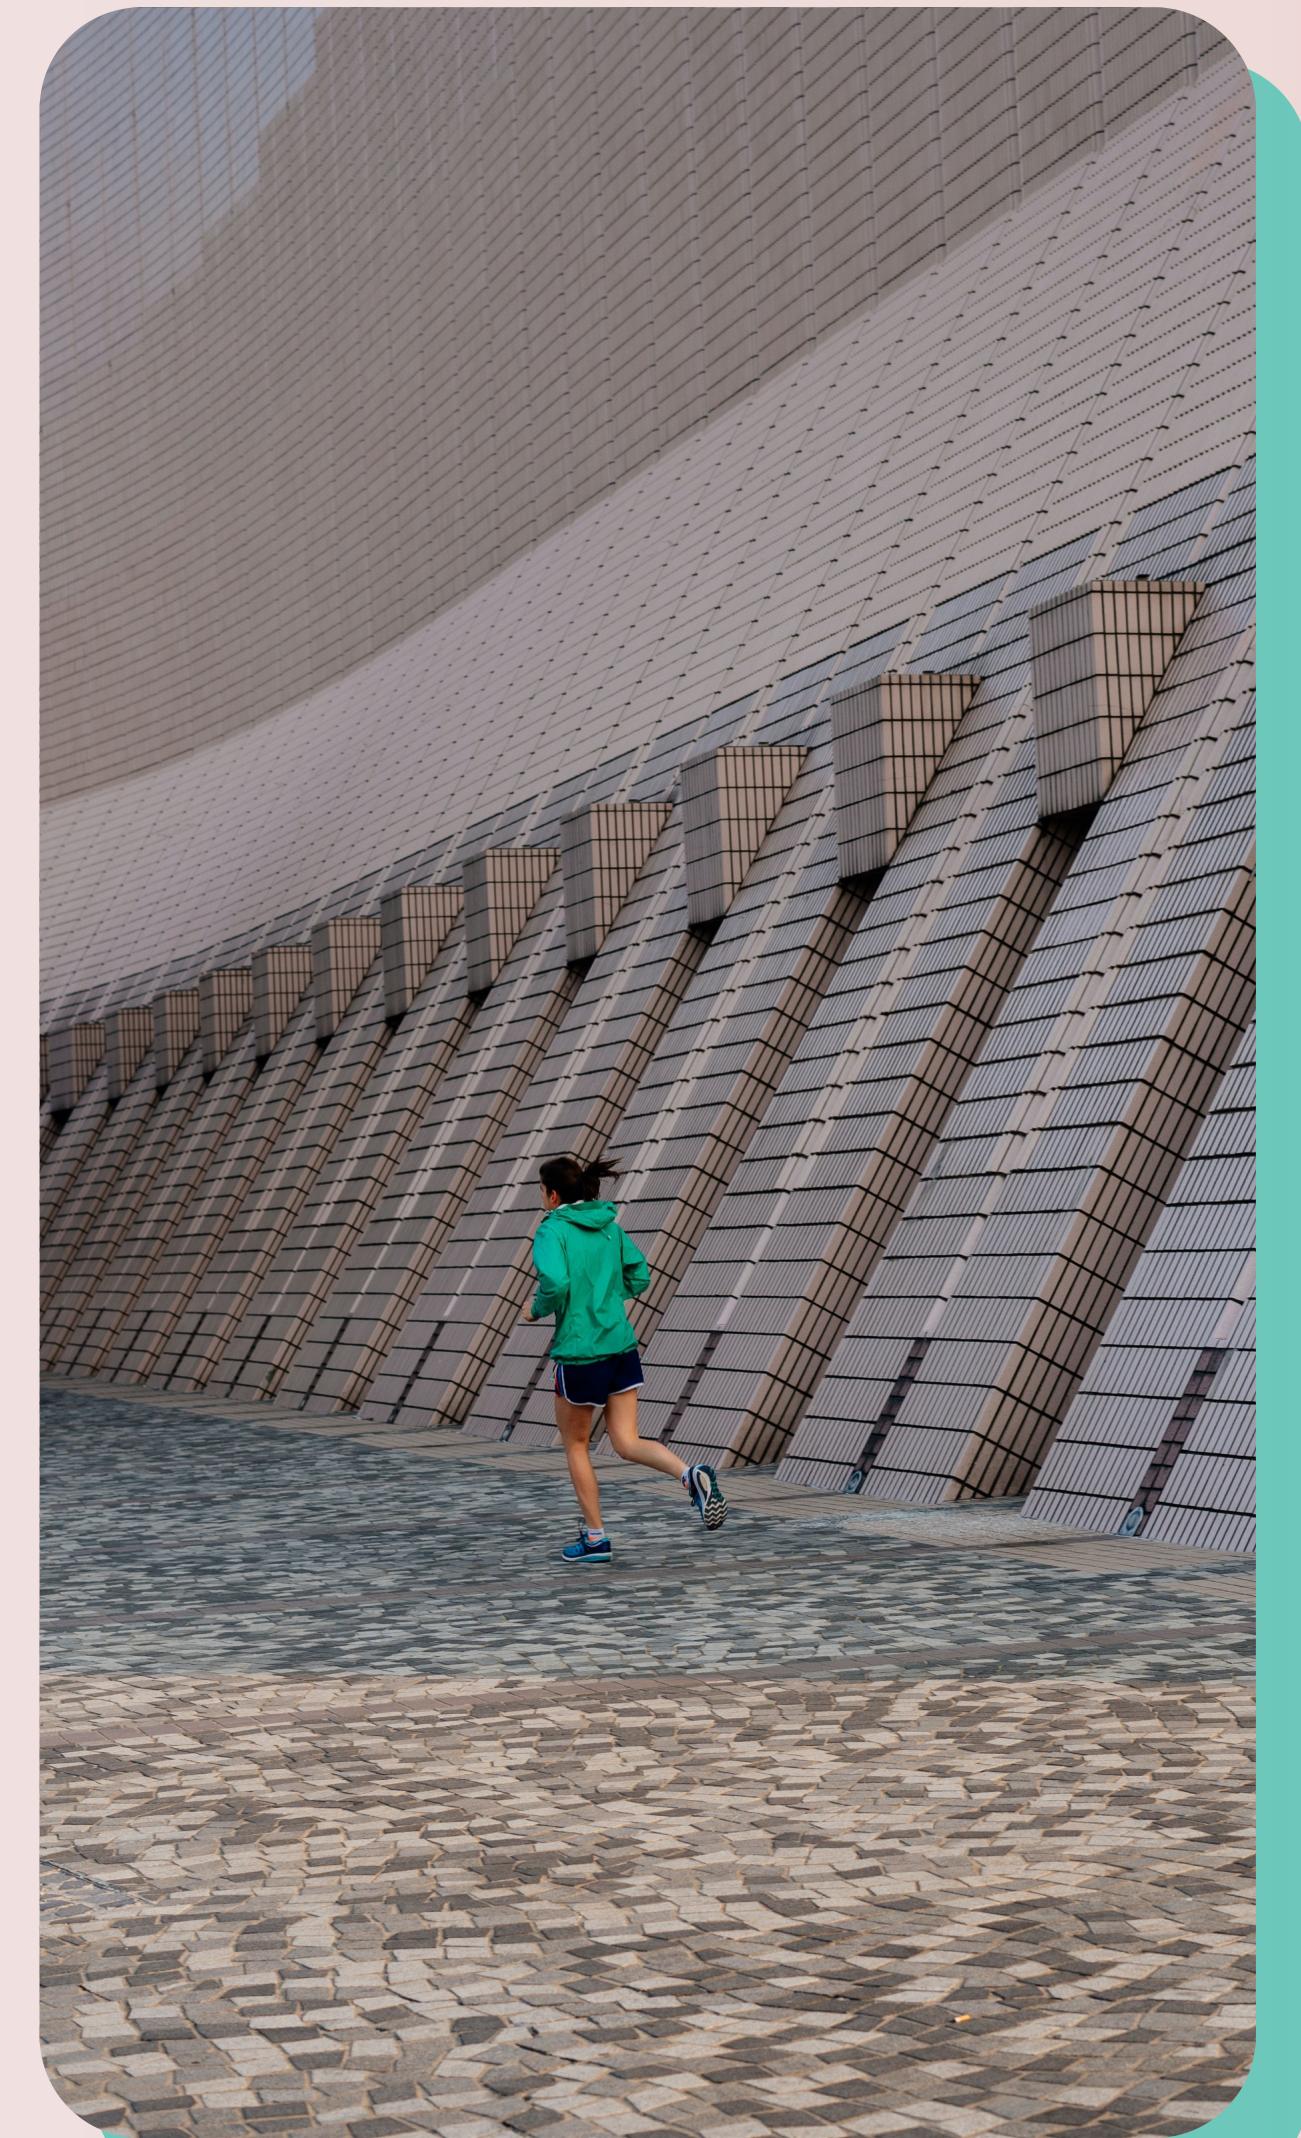

Rebecca L. - Age 66, Female, Surrey, BC, Canada

I COULD NOT SQUAT AND STAND UP DUE TO KNEE ARTHRITIS. I AM FREE NOW!

I am excited and want to brag about MegaGen. Menopause hit me earlier than others and I started to suffer from consequences of menopause. What bothered me the most was pain in bending my knees. I could not squat and stand up due to severe pain. I was soon diagnosed with arthritis and my doctor prescribed injection once a week for five weeks. Then I was also diagnosed with osteoporosis when I broke my ankle. I had to put titanium rod surgically. Moreover, working in a store everyday exhausted me, and every year I had to rely on expensive herbal tonics to maintain my stamina. One day my missionary friend recommended me MegaGen, and I have taken it for about 8 months now. The first thing I noticed was that I was able to endure through hot summer season without exhaustion! I shared it with my colleagues at work and they are also impressed by its rejuvenating effect.

Mary Park - Age 46, Female

I GREW TALLER 17 CM IN 8 MONTHS! I AM NOT A SHORTY ANYMORE.

I was a short 10th grader with the height of 153 cm. I could only reach the chin of my friends. Then my mother got me Osso Junior in October of 2015. For two months I could not notice any change. In the past, I also tried so many different things to grow taller, but all have failed. Not having better options, I decided to try Osso Junior for at least 6 months. Then from this January (2016), I started to experience the dramatic effect. 1 cm and then 1.5 cm, I was growing taller. August 20th of 2016, my official height was 170 cm!!! Everyone who saw me growing was simply amazed. I am amazed! My mother is keeping this a secret from my father until he comes back from his long business trip to Korea. I hope he recognizes me. Osso Junior is a miracle for me.

Joon Y. Kim - Age 15, Male, Canada

6 BOTTLES OF MEGAGEN RELIEVED ME FROM CALCIFIC TENDONITIS. NOW I CAN LIVE A NORMAL LIFE!

When I had pains in my shoulder and could not move well, I thought I had frozen shoulder. Visiting my doctor revealed that I had calcification on enthesis which caused inflammation. I took prescribed anti-inflammatory analgesic drugs, but the relief only lasted briefly. It bothered me enough to affect taking care of my kids. After I met MegaGen, the pain almost disappeared only after a few days and my mobility returned. When I took another picture at the hospital the calcification has disappeared, to my doctor's surprise. I have taken MegaGen for 6 months only. Highly recommended Pronuvia to everyone around me.

S. W. Shin - Age 46, Female, Richmond, Canada

NO BONE GRAFT NEEDED FOR IMPLANT. DENTIGEN DID THE JOB!

My dentist extracted my molar tooth with cavity 6 months ago. He recommended that I do an implant after bone graft. I then remembered hearing about DentiGen and told him that I would come back after increasing my jaw bone density. The dentist said that there is simply no way to increase jaw bone density and that he would eat his hat if my bone density increased. For a few months I took DentiGen faithfully and visited the dentist. He could not believe what he saw in xrays! He did not end up eating his hat but confirmed that now implant is doable due to increased jaw bone density. Wow!

Soonok Chung - Age 47, Female
